---

No public comments were received.

---

**OPEN SESSION - ACTION ITEMS (ITEMS 1-7)**

---

**Action Item 1 – Fiscal Year 2020-21 Facility Modification Budget**

The committee approved the proposed Fiscal Year 2020-21 Facility Modification budget. (*Motion: Rockwell; Second: Orr*)

**Action Item 2 – List A – Emergency Facility Modification Funding (Priority 1)**

The committee approved 95 projects for a total of \$3,102,966 to be paid from Facility Modification program funds to be encumbered for Priority 1 projects. (*Motion: Haehnle; Second: Highberger*)

**Action Item 3 – List B – Facility Modifications Under \$100K (Priority 2)**

The committee approved 116 projects for a total of \$1,127,637 to be paid from Facility Modification program funds to be encumbered for Priority 2 projects Under \$100K. (*Motion: Highberger; Second: Parker*)

**Action Item 4 – List C – Cost Increases Over \$50K**

The committee approved 8 projects for a total cost increase of \$1,561,770 to the Facility Modification program budget. (*Motion: Vallarta; Second: Parker*)

**Action Item 5 – List D – Facility Modifications Over \$100K**

The committee approved 7 projects for a total cost to the Facility Modification Program budget of \$5,481,562. (*Motion: Landry; Second: Haehnle*)

**Action Item 6 – Leak Assessment and Mitigation**

The committee:

- 1) Reviewed historical data on the categories of plumbing leaks and the buildings in which the leaks predominantly occur, and considered two different options proposed by staff to mitigate their impact; and

- 2) Approved Option 1 which authorizes staff to use Planning funds from the FY 2020-21 Facility Modification Budget previously approved in Action Item 1 to hire a plumbing contractor to assess the top five buildings with the highest domestic water and fixture leaks and provide a project estimate to mitigate. The RFP for the plumbing contractor will be written with flexibility to allow for the possibility of moving forward with the actual mitigation work described in Option 2. Staff will report to the committee at the next TCFMAC meeting scheduled for August 31, 2020. (*Motion: Highberger; Second: Rockwell*)

### **Action Item 7 – Orange County Central Justice Center – Latest Communication from California State Fire Marshal**

The committee:

- 1) Reviewed two options presented by staff for funding the fire/life/safety corrections to the Orange County Central Justice Center as required by the California State Fire Marshal; and
- 2) Approved Option 1 which authorizes staff to submit a Budget Change Proposal to fund the necessary work. (*Motion: Highberger; Second: Orr*)

---

### **OPEN SESSION - DISCUSSION ITEMS (ITEMS 1-7) (NO ACTION REQUIRED)**

---

#### **Discussion Item 1 – List E – Approved Court-Funded Requests (CFRs)**

The committee reviewed CFR projects approved by the Facilities Services Deputy Director since the last meeting. 12 CFRs were approved, and 1 CFR was cancelled during this period.

#### **Discussion Item 2 – List F – Funded Facility Modifications on Hold**

The committee reviewed the standard list of previously funded FMs on hold.

#### **Discussion Item 3 – Guidelines for the Responsibility of Facility Costs between the Judicial Council and Trial Courts**

The committee received an update on the *Guidelines for the Responsibility of Facility Costs between the Judicial Council and Trial Courts* (formerly named *Facilities Funding Responsibilities between the Judicial Council and Superior Courts*).

#### **Discussion Item 4 – Sustainability Plan Update**

The committee received an update on the Sustainability Plan.

#### **Discussion Item 5 – Leasing Expense and Revenue Forecast**

Staff presented a report on Judicial Council leasing expenses and revenues.

#### **Discussion Item 6 – Re-evaluate Guidelines for Priority 1 Emergency Elevator Calls**

ADVISORY COMMITTEE

Meeting Date: 08/31/2020

## **Action Item 1 – (Action Required) - List A – Emergency Facility Modification Funding (Priority 1)**

### **Action Requested:**

Approve 108 projects for a total of \$1,961,069 to be paid from Facility Modification program funds to be encumbered for Priority 1.

### **Supporting Documentation:**

- List A – Emergency Facility Modification Funding Report (Priority 1)

\*\*\*\*\*

### **Priority 1 = Immediately or Potentially Critical.**

Condition requires immediate action to return a facility to normal operations, or a condition that will become immediately critical if not corrected expeditiously. Such conditions necessitate the need to stop accelerated deterioration or damage, to correct a safety hazard that imminently threatens loss of life or serious injury to the public or court employees, or to remediate intermittent function and service interruptions as well as potential safety hazards. Such conditions may include, but are not limited to, the following: major flooding; substantial damage to roofs or other structural building components; or hazardous material exposure. Depending on scope and impact, a severe deterioration in life safety protection may also be considered a priority 1 condition requiring a facility modification.

Owing to their critical nature, priority 1 requests will be addressed immediately by JCC staff using internal procedures that ensure timely and effective responses to unplanned emergency or potentially critical conditions, including a method and a process for setting aside funds to address priority 1 conditions.

Discussion Item 3: Guidelines for the Responsibility of Facility Costs between the Judicial Council and Trial Courts	

---

This memorandum is for informational purposes to provide a general overview of the context of the document that was previously titled *Facilities Funding Responsibilities between Judicial Council and Superior Courts* and is now referred to as the *Guidelines for the Responsibility of Facility Costs between the Judicial Council and Trial Courts* (“**Cost Responsibility Guidelines**”) as well as the status of its review.

#### **Background**

At its meeting on March 8, 2019, the Trial Court Facility Modification Advisory Committee (“**TCFMAC**”) reviewed the prior draft of the Cost Responsibility Guidelines and approved staff to submit the document for public comment and court feedback. Staff received numerous comments raising various questions and concerns with the document itself as well as the impacts thereof.

To generally clarify at the outset, the Cost Responsibility Guidelines document is intended only to be operating guidelines and a reference tool to help guide the TCFMAC and Judicial Council staff

in determining responsibility for the funding of various trial court facility projects as set forth therein. The Guidelines do not change or shift any responsibilities for such costs; but, they instead merely reflect the existing interpretation and application of pertinent requirements including those under rule 10.810 of the California Rules of Court (“**Rule 10.810**”). The Cost Responsibility Guidelines are not intended to become a policy approved by the Judicial Council.

### **Revised FM Policy and Former FM Priority Guidelines**

For context, the *Trial Court Facility Modifications Policy* (“**FM Policy**”) was revised and adopted by the Judicial Council on March 15, 2019, thereby superseding the July 2012 version. The FM Policy describes what constitutes a facility modification and the methodology and process for their identification and prioritization.

When comments on the draft Cost Responsibility Guidelines document were first requested on June 10, 2019, a *Narrative of Changes to Previous Guidelines Document* (“**Narrative**”) was also provided to assist the trial courts’ review. This Narrative referenced 17 guidelines that were part of a document titled, *Guidelines for Prioritizing and Ranking Facility Modifications* (“**Former FM Priority Guidelines**”). These Former FM Priority Guidelines were intended to set forth the process for prioritizing and ranking facility modifications. The Former FM Priority Guidelines were reviewed by TCFMAC in April 2015, but were not recommended for Judicial Council review/adoption. These Guidelines have no applicability given that the prioritization of facility modifications is now addressed directly in the Judicial Council’s March 2019 FM Policy.

Thus, by reflecting existing interpretations, the new Cost Responsibility Guidelines document is simply meant to aid in determining the responsibility of costs for facility projects between the Judicial Council and trial courts in conjunction with the March 2019 FM Policy. It is anticipated that the Cost Responsibility Guidelines document will be used in this manner by the TCFMAC and Judicial Council staff, particularly those in the field.

### **New or Added Items**

While the Cost Responsibility Guidelines document sets forth the Judicial Council and trial courts’ respective responsibilities for facility costs, certain items were characterized as being added or new. However, such items were added within the overarching framework under which the party responsible for associated costs is interpreted, and Judicial Council policy on said responsibilities is not being shifted. The Guidelines document is instead incorporating updates for new, changing, and different building systems, components, and equipment (i.e., the introduction of new technology, the more-prevalent use of certain components in court facilities, etc.), which was not previously and/or may become part of court facilities over time. Similar subsequent updates will likely continue to be necessary in the future. An example of such updates would be the installation, maintenance, and operation of electrical car charging stations at court facilities. The Guidelines

document also corrects the responsibility for any items that may have been previously classified incorrectly.

To help clarify this, and at the suggestion of the Court Executives Advisory Committee's (CEAC) Ad Hoc Working Group on Trial Court Facilities, staff has added the four columns shown below to Tables A and B in the Cost Responsibility Guidelines document to delineate any change in responsibilities:

Currently Responsible	Change of Responsibility to	Impact of Change (if known)	Authority for the Change
-----------------------	-----------------------------	-----------------------------	--------------------------

**Further Review**

At this time, the following documents are being provided for further review and comment:

1. Attachment 1: Updated draft of the *Guidelines for the Responsibility of Facilities Costs between the Judicial Council and Trial Courts*, revised in response to the received comments
2. Attachment 2: Summary of comments with Judicial Council staff responses
3. Attachment 3: Updated Table A at CEAC's request
4. Attachment 4: Updated Tables B at CEAC's request
5. Attachment 5: Former *Guidelines for Prioritizing and Ranking Facility Modifications*, adopted by the TCFMAC in April 2015

# Guidelines for the Responsibility of Facilities Costs between the Judicial Council and Trial Courts

---

DRAFT FOR REVIEW BY THE  
TRIAL COURT FACILITY  
MODIFICATION ADVISORY COMMITTEE  
JULY 20, 2020

JUDICIAL COUNCIL  
OF CALIFORNIA

---

TRIAL COURT FACILITY MODIFICATION  
ADVISORY COMMITTEE

The *Guidelines for the Responsibility of Facilities Costs between the Judicial Council and Trial Courts* (Guidelines) are intended only to be operating guidelines and as reference to help guide the Trial Court Facility Modification Advisory Committee and Judicial Council staff in determining responsibility for the funding of various trial court facility projects. These Guidelines do not change or shift any responsibilities for such costs; but, they instead merely reflect the existing interpretation and application of pertinent requirements including those under rule 10.810 of the California Rules of Court (Rule 10.810). These Guidelines are not intended to become a policy approved by the Judicial Council. As such, in the event of any conflict between the Guidelines and applicable law, including Rule 10.810, applicable law shall control and prevail. Additionally, the Guidelines incorporate updates (and will likely require subsequent updates) for new, changing, and different building systems, components and equipment (i.e., the introduction of new technology), which was not previously and/or may become part of court facilities over time.

## A. CAPITAL COST RESPONSIBILITIES

Judicial Council is generally responsible for costs relating to the construction of capital-outlay projects for trial court facilities; however, the trial courts and the counties are responsible for the following items specified in the table below. The responsibilities for costs of operations and maintenance (O&M) projects and facility modifications is shown in Section B below.

Items	Trial Court Responsibility	County/Other Responsibility
Wall Art	X	
File Tracking system	X	
Break room equipment movable (e.g. microwave, etc.)	X	
Office equipment (e.g. phone, computers, printers, fax machines, copier, postage meter)	X

Safes	X	
Local servers, printers, faxes	X	
Outside communication – Cable TV, telephone recurring monthly cost	X

## **B. OPERATIONS AND MAINTENANCE PROJECTS AND FACILITY MODIFICATIONS COST RESPONSIBILITIES**

The Judicial Council has the general responsibility for building systems, components and equipment in court facilities. Subject to the availability of sufficient funding as discussed below, the Judicial Council is generally responsible for the costs of O&M projects and facility modifications for these building systems, components and equipment. However, and as described herein, trial courts are responsible for certain costs for these types of projects including those pursuant to Rule 10.810 and applicable law.

To clarify, this section only applies to O&M projects and facility modifications in existing court facilities and does NOT pertain to responsibilities for costs of building systems, components and equipment in capital-outlay projects. The Judicial Council is generally responsible for capital-outlay costs, and the items trial courts and the counties are responsible for are shown in Section A above.

All work, whether an asset renewal, renovation, replacement or repair, is subject to budget availability regardless of the fund source. Tables A and B below identify the potential funding sources for work associated with specific components and systems. Because current funding does and will most likely continue to lag demand, O&M projects and facility modifications that are the responsibility of and funded by the Judicial Council will be prioritized in alignment with the council's *Trial Court Facility Modifications Policy*. In the event sufficient funding is unavailable to prioritize an O&M project or facility modification requested by a trial court, that trial court may instead elect to use its operating funds pursuant to the council's *Court-Funded Facilities Request Policy*. Regardless of funding source, it is anticipated and typical that the work will be performed by a Judicial Council-contracted Service Provider or contractor.

Tables A and B below intend to provide guidance on primary funding responsibility with respect to different building systems, components and equipment. While neither complete nor exhaustive lists, these tables are as comprehensive as possible in referencing most systems, components and equipment common to court facilities:

- Table A identifies the funding responsibility for building systems, components and equipment in general, except for building security systems, which are shown in Table B.
- Table B identifies the funding responsibility for building security systems exclusively. All security-related projects must be coordinated with Judicial Council Facilities Services' Security Unit. The justification and related scoring for security-related projects should be confirmed by Judicial Council Facilities Services for validity and not beyond Judicial Council standards.

For the majority of court facilities jointly occupied by a trial court and county, either the Judicial Council or county is designated as the *Managing Party* for that court facility, which typically (but not always) was determined by the parties' ownership and/or majority equity interest based on their respective occupancy of the facility. The Managing Party is responsible for maintenance and

renovations of the court facility's various building systems. Therefore, it is common for the county to be responsible for a court facility's O&M projects and facility modifications.

<sup>2</sup> The use of public resources by public employees in the workplace for personal benefit is not acceptable pursuant to California Government Code section 8134. Addition of the new charging stations to existing facilities as Facility Modification will be considered Priority 5. In the new Capital projects, electric car charging stations are required for the public by Cal Green. A trial court has the option of installing charging stations using third-party providers (e.g., Blinkcharging, Plugshare, Chargepoint). The installation of any electric car charging stations should not overload existing circuits, switches or transformers. All work will have to be done pursuant to the California Rules of Court through Judicial Council Facilities Services as a Court Funded Request. Users should pay fees consistent with comparable public charging stations for the cost of electricity consumed, and the electric car charging service provider must reimburse the Judicial branch for the power used unless a separate meter is installed directly by provider.

<sup>3</sup> The above rules do not apply to court facilities and parking lots managed by and the responsibility of the local county. Facility Modification funds can be used for car charging stations at the discretion of Trial Court Facility Modification Advisory Committee.

## **Facility Modifications in Court Facilities to Be Replaced with Funded Capital Projects**

The use of Facility Modification (FM) funds in court facilities to be replaced with funded Capital Projects that will result in the court vacating the existing facility needs to be scrutinized. Since the time from the funding of a Capital Project to move-in is often five or more years, it is unreasonable that no FM funding will be approved. The challenge is to fund only those FM projects that are critical to continue the operations of the court facility and to prevent excessive deterioration, but are also cost proportionate to the amount of time the court will remain in the facility. The following guidelines should be used in making such funding decisions:

1. FM projects that are critical to continue the normal operations of the facility should be funded.
2. Fire, life, safety and security issues normally will be funded.
3. When the cost of maintenance and/or operations due to failing systems is determined to exceed the cost of repair work to fix said failed system, the FM should be funded. For example, the impact to operations and/or cost of deterioration due to roof leaks at a court facility which the court is scheduled to vacate in five years may justify the replacement of the roof even though the roof will last for 20 years.
4. Any limited life of a court facility should be taken into consideration when determining whether the FM actions are needed.

FM funds will not be used to supplement or reimburse costs relating to a Capital Project. This includes contributing FM funds to a Capital Project, reimbursing the Judicial Council with FM funds for cost overruns, or reimbursing a trial court with FM funds for work performed as part of a Capital Project. This fund exclusion does not extend to FM work occurring after the completion of a Capital Project to enhance operations, improve the maintainability of the facility, or maintain the facility after expiration of warranties. In Capital Projects that occur in an existing court facility, this fund exclusion does not pertain to the repair or maintenance of items outside the scope of the Capital Project.

		<p><u>Background</u></p> <p>The June 10 materials actually comprise two documents: the <i>Facilities Funding Responsibilities between Judicial Council and Superior Courts</i> document (Funding Document) and a document entitled <i>Narrative of Changes to Previous Guidelines Document</i> (Narrative). The Funding Document, by its own terms, purports to embody "guidelines to help guide the Trial Court Facilities Modification Advisory Committee and Judicial Council staff with respect to determining responsibility for the funding of various trial court facility matters." The Narrative is intended to serve as a guide to the Funding Document (although, as noted below, there are issues with attempting to understand the history of, and relationship between, these two documents and other documents that were not provided to the courts).</p>	
		<p><u>The Narrative's use of the term "Added Item" is misleading</u></p> <p>The Narrative repeatedly uses the term "Added Item" to refer to various items of expense. This is problematic. For one thing, the use of "added" begs the question - added to what? As discussed in detail below, there is an additional document-which was not provided to the trial courts on June 10- that must be reviewed in order to understand the reference to items being "added."</p> <p>More critically, however, "Added Item" suggests that these items of expense are themselves new. In fact, nothing could be further from the truth. Each of the "Added Items" are in fact items of expense that have existed since the Judicial Council assumed responsibility for trial court facilities in the early-to-mid-2000s. In the intervening decade-plus, one entity or the other-the JCC or the trial courts-has had to pay for these items.</p>	<p><i>Added Item</i> means that the original guidelines did not have this item clarified and was subject to interpretation. This has been done to clarify the funding responsibility.</p> <p>These expenses are not new but were not documented in the draft Guidelines.</p>

		<p><u>It appears that some of the "Added Items" would shift costs that have historically been borne by the JCC to the trial courts</u></p> <p>Many of the "Added Items" appear to codify historical practice in terms the cost split between the Judicial Council and the trial courts. However, on some of the items of expense, the "guidelines" appear to be proposing to <u>change</u> historical practice, i.e., to shift costs from the council to the courts. Thus, these guidelines would lead the trial courts to incur new expenses that have not historically been a part of our budgets.</p>	<p>Previous guidelines refer to the attached <i>Guidelines for Prioritizing and Ranking Facility Modifications</i>, which are now superseded by the current draft guidelines under review. Prior to being superseded, the <i>Guidelines for Prioritizing and Ranking Facility Modifications</i> had been included in a document the Trial Court Facility Modification Advisory Committee (TCFMAC) used to aid its decision making for prioritizing and ranking facility modifications. It was last reviewed by the TCFMAC in April 2015 and remained at the committee level without being submitted to the Judicial Council for adoption. Those Guidelines were the genesis from which the current draft Guidelines have been created.</p>
		<p>For example, Item 11 in Table B (Interview Rooms -Active Communication) is listed as an "Added Item" in the Narrative. Turning to the Funding Document, as one must then do, we see that that item is listed as being a trial court expense. However, historically the council has assumed the cost of maintenance and repair of active communication devices in interview rooms. Depending on the size of the court, the volume of criminal matters, and the staffing level of sheriff's deputies, the cost of repairing these devices-which are frequently damaged by defendants-can be very high. If a cost of this potential magnitude is to be shifted to the courts, that decision should be fully and transparently vetted.<sup>1</sup></p> <p>To the extent it may impose new costs on the trial courts. It is unclear whether the Funding Document is within the scope of TCFMAC's authority</p>	<p>(Page 13): This has been corrected to reflect it is a Judicial Council responsibility.</p> <p>The development of the current draft Guidelines does not add new costs to the trial courts' responsibility but defines the funding responsibility between the Judicial Council and trial courts.</p>

Draft Guidelines for the Responsibility of Facilities Costs between the Judicial Council and Trial Courts  
(formerly titled, *Facilities Funding Responsibilities between Judicial Council and Superior Courts*)**

	Commentator	Comments	Judicial Council Staff Responses
		<p>It is not clear, from the Funding Document or the accompanying email, whether TCFMAC intends for the draft document to go to the Judicial Council for approval. If not, then it appears that the document exceeds the scope of TCFMAC's authority as set forth in rule 10.65 of the California Rules of Court. While that rule authorizes the committee to "[make] recommendations to the council on funding and ... [take] additional action in accordance with council policy, both for facility modifications and for operations and maintenance," it does not appear to authorize TCFMAC, without council review and approval, to make decisions that would have the effect of reapportioning fiscal responsibility as between the Judicial Council and the trial courts. As such, we are requesting clarification as to whether this document will be presented to the council for approval and, if not, the authority supporting that TCFMAC can, without council approval, authorize Judicial Council staff to transfer former Judicial Council fiscal responsibilities to the trial courts.</p>	<p>The TCFMAC does not intend to recommend the Guidelines for Judicial Council review/adoption, as they do not reapportion fiscal responsibilities between the Judicial Council and trial courts but clarify current responsibility for costs for systems, components, and equipment of capital, operations/maintenance (O&amp;M), and facility modifications (FMs) projects. Moreover, the TCFMAC is responsible for spending the allocated budget each year on the Facility Modifications and is within its authority to deny funding for certain type of projects, which does not constitute reapportioning any fiscal responsibility. The TCFMAC will continue to defer lower priority FMs which the Judicial Council does not have sufficient funding to perform per the council's <i>Trial Court Facility Modifications Policy</i>, and the Courts will continue to have the option of submitting court-funded facilities requests.</p>
		<p><u>The materials as presented omit critical information about these documents, making meaningful public comment difficult</u></p> <p>As noted above, the June 10 materials comprise the Funding Document and the Narrative, and the latter refers to "Added Items" in multiple places. The Narrative also repeatedly refers to a "previous" guidelines document and contains a key not only to the two charts in the Funding Document, but also to those "Guidelines," including noting that some are being added and/or moved into other documents.</p>	<p>Previous guidelines refer to the attached <i>Guidelines for Prioritizing and Ranking Facility Modifications</i>, which are now superseded by the current draft Guidelines under review.</p>

		Unfortunately, those "Guidelines" were not included in the June 10, 2019, packet, nor are they referenced specifically in the Funding Document.	Same comment as above.
		Through additional research, we have determined that the "Guidelines" referenced in the Narrative likely refers to a draft document from April 13, 2015 entitled <i>Guidelines for Prioritizing and Ranking Facility Modifications</i> . To the best of our ability to discern, that document never made it out of draft form and never advanced further than TCFMAC. As far as we can tell, that draft document reflects the only instance in which TCFMAC has purported to articulate funding responsibilities as between the council and the trial courts; neither <i>the Trial Court Facilities Modifications Policy</i> adopted by the council on July 27, 2012, nor the Revised Trial Court Facilities Modifications Policy adopted by the council on March 15, 2019, do so.	Previous guidelines refer to the attached <i>Guidelines for Prioritizing and Ranking Facility Modifications</i> , which are now superseded by the current draft Guidelines under review. Prior to being superseded, the <i>Guidelines for Prioritizing and Ranking Facility Modifications</i> had been included in a document the TCFMAC used to aid its decisionmaking for prioritizing and ranking facility modifications. It was last reviewed by the TCFMAC in April 2015 and remained at the committee level without being submitted to the Judicial Council for adoption. Those Guidelines were the genesis from which the current draft Guidelines have been created.
		Thus, it appears that TCFMAC is now seeking comments on a revision to a draft 2015 document, without providing that original document or even referencing its specific existence. We are concerned that many potential commenters will be left to wonder not only what exact language is being changed (given that the Narrative doesn't include specific "before" and "after" language), but also the identity of the document to which those changes are being applied.	Same comment as above.
		In our view, decisions regarding funding-particularly where funding responsibilities may be being shifted from one entity to another-should be made with the utmost transparency. At a minimum, we would request that no decisions be made until JCC staff fully explain to all of the trial courts the full history of the "Guidelines," including the 2015 document.	The TCFMAC does not intend to recommend the Guidelines for Judicial Council review/adoption, as they do not reapportion fiscal responsibilities between the Judicial Council and trial courts but clarify current responsibility for costs for systems, components, and equipment of capital, O&M,

		<p><u>The relationship between the Vandalism and Graffiti Mitigation Attachment to the Revised Trial Court Facility Modifications Policy and the Funding Document must be clarified</u></p> <p>As noted, on March 15, 2019, the Judicial Council approved and adopted a revised version of the Trial Court Facility Modifications Policy (Revised Policy) that was originally adopted on July 27, 2012. The Revised Policy includes an Attachment A that contains a page entitled Vandalism and Graffiti Mitigation. On that page, the Revised Policy clearly stated that "[t]he Judicial Council has the responsibility for damage that occurs to court facilities as a result of vandalism."</p>	<p>and FM projects.</p> <p>Graffiti is a subset of Vandalism. Vandalism that is classified as Priority 1 and Priority 2 are addressed. Graffiti in public spaces is addressed. Non-public area graffiti is a lower priority FM.</p>
		<p>We request clarification as to how that unambiguous statement relates to the proposed cost responsibilities set forth in the Funding Document. Specifically, does that mean that even where the Funding Document identifies the cost of a facilities-related item as being a court expense, where that same item is damaged as a result of vandalism, the repair cost will be borne by the council?</p> <p>For example, and returning to Item 11 in Table B (Interview Rooms - Active Communication) of the Funding Document, if an active speak-through device in an interview room is destroyed by an in-custody defendant, will the repair/replacement cost be absorbed by the council under the Vandalism and Graffiti portion of the Revised Policy? Or will the trial court be expected to pay that cost under the language of the Funding Document? If the intent is the latter, we reiterate our concern as articulated above about the scope of the TCFMAC's authority, particularly as it pertains to modifying the clear language in a policy adopted by the Judicial Council.</p> <p><u>To the extent costs would be shifted from the council to the trial courts via the Funding Document, such should not happen without a fiscal impact</u></p>	<p>If a system is maintained by Judicial Council and it is damaged as a result of vandalism, then Judicial Council is responsible for repairing it. Similarly, if a system is maintained by a trial court and it is damaged as a result of vandalism, then the trial court is responsible for repairing it.</p> <p>(Page 13): Item 11 in Table B has been corrected to indicate that Active Communication devices in Interview Rooms are a Judicial Council responsibility. For example, if the active communication device is destroyed by an in-custody defendant, then the cost is the responsibility of the Judicial Council because that system is a Judicial Council responsibility.</p> <p>The TCFMAC does not intend to recommend the Guidelines for Judicial Council</p>

		<p><u>analysis and a clear strategy for addressing those new costs through legislation or BCP.</u></p> <p>As noted, it is somewhat unclear from the documents that were presented to the courts-particularly in the absence of the 2015 Guidelines document-the extent to which TCFMAC is proposing to shift costs from the council to the trial courts. The presence of the Vandalism and Graffiti portion of the Revised Policy further complicates efforts to ascertain the answer to that question.</p>	<p>review/adoption, as they do not reapportion fiscal responsibilities between the Judicial Council and trial courts but clarify current responsibility for costs for systems, components, and equipment of capital, O&amp;M, and FM projects.</p>
		<p>To the extent the intent of the Funding Document is to shift costs-any costs-we would request that the Funding Document not be approved or submitted to the Judicial Council for approval without a thorough analysis of the fiscal impact of those shifts on the trial courts. Further, and given the already extensive underfunding of the trial courts, we would request that no costs be shifted unless and until a strategy is in place for addressing those increased costs, whether via budget trailer language, the BCP process, or otherwise.</p>	<p>Same comment as above.</p>
		<p>Again, we thank you for the opportunity to review these documents and provide commentary on them, and we are happy to answer any follow-up questions you may have.</p> <p>Footnote 1: Please see discussion re "Vandalism" policy below for a possible caveat to this comment.</p>

4.	Lloyd Connelly, Court Executive Officer	<p><b>Superior Court of California, County of Sacramento</b></p> <p>The Trial Court Facilities Act of 2002 transferred the responsibility for court facilities from the county to the state. Pursuant to GC Section 70301, "responsibility for facilities" means the obligation of providing, operating, maintaining, altering, and renovating a building that contains the facilities. "Maintenance" means the ongoing upkeep of buildings, equipment, grounds, and utilities required to keep a building and its systems in a condition adequate to support its designed level of service. Funding for the ongoing operations and maintenance of court facilities was established through the County Facilities Payments and is deposited into the Court Facilities Trust Fund. As stated in GC Section 70352(b) the money deposited in this fund shall be administered by the Judicial Council for the operation, repair, and maintenance of court facilities. The Draft Facilities Funding Responsibilities between Judicial Council and Superior Courts proposes transferring the primary funding responsibilities of specific operations and maintenance items onto trial courts. Budget shortfalls in the Court Facilities Trust Fund does not negate the fact that the on-going operations and maintenance (O &amp; M) of court facilities is a Judicial Council responsibility, not a Superior Court responsibility. Furthermore, Sacramento Superior Court does not have the ability to meet the financial commitment of absorbing the costs associated with these proposed changes within our baseline general fund budget. As such, this Court opposes assuming the funding responsibility for building systems, components, equipment or fixtures that are not a court operations or Rule 10.810 allowable expenditure. Items historically maintained by the county (pre transfer) and the JCC maintenance provider, should remain a Facilities Services responsibility.</p>	<p>The current draft Guidelines do not propose transferring the primary funding responsibilities of specific O&amp;M items onto trial courts but instead clarify current responsibility for costs for systems, components, and equipment of capital, O&amp;M, and FM projects. For FMs other than Priority 1 or 2, available funding continues to lag demand; therefore, O&amp;M and FM projects that are the responsibility of and funded by the Judicial Council will be prioritized in alignment with the council's <i>Trial Court Facility Modifications Policy</i>. In the event that sufficient funding is unavailable to prioritize an O&amp;M or FM project requested by a trial court, the trial court may instead elect to apply its operating funds to the project pursuant to the council's <i>Court-Funded Facilities Request Policy</i>.</p>

		<p>The proposed changes conflict with prior agreements between the AOC and Court. The July 1, 2009, MOU between the Judicial Council and Sacramento Superior Court (MOU # 09-34-Rule 10.810 Facility Management Services) identifies the AOC versus Court responsibilities for building systems and equipment. Exhibit C of this MOU is in conflict with Table A.</p> <p>The components of the County Facilities Payment were based upon the actual annual direct and indirect county expenditures on court facilities. Prior to the building transfers, Sacramento County performed hardscape ground maintenance at all Sacramento courthouses. These services included daily washing of the entryways and hard surfaces surrounding the buildings, as well as cleaning the exterior windows on an annual basis. The cost for these performed services were incorporated into the County Facilities Payment for Sacramento. As such, the funding responsibility for these services should remain a JCC responsibility.</p>	<p><i>Guidelines for Prioritizing and Ranking Facility Modifications</i> had been included in a document the TCFMAC used to aid its decisionmaking for prioritizing and ranking facility modifications. It was last reviewed by the TCFMAC in April 2015 and remained at the committee level without being submitted to the Judicial Council for adoption. Those Guidelines were the genesis from which the current draft Guidelines have been created.</p> <p>The draft Guidelines are not intended to supersede any existing agreement currently in force or the council's <i>Court-Funded Facilities Request Policy</i>.</p> <p>Under Government Code section 70356, County Facilities Payments were based on calculating the five-year average of the cost expended by the county on facility operation and maintenance from 1995 to 2000, which have not been increased since that time. Consequently, and based on the current funding level, the Judicial Council does not have the ability to powerwash or clean the exterior on a daily basis.</p>
		<p>Table A - Building Envelope, Items 2, 4 and 5: Government Code Section 70301, includes under the definition of "maintenance" the ongoing upkeep of building "grounds" and there are areas, especially surrounding outside trash containers, that require power washing. Poorly kept grounds reflect a bad image of the court system. Furthermore, exterior window washing, especially in a high-rise courthouse where use of any type of horizontal life line or platform</p>	<p>(Page 5): The Judicial Council will keep the window washing equipment certified for high-rise buildings and the outside cleaning of the exterior windows has been clarified to be Judicial Council cost. However, janitorial and cleaning are still Trial Court expenses.</p>

		system requiring an annual certification, should not be a court funded obligation.	
		Table A - Electrical, Item 16: Unclear. Historically, building UPS systems that are hardwired to an electrical panel are maintained by Facilities Services. Rack-mounted UPS's are a court responsibility. Please clarify this is not changing.	(Page 6): Hard-wired language has been added to Item 47.
		Table A - Electrical, Item 17: Unclear what building components and equipment is included within this line item. Sacramento has been informed by the JCC that the Converge Network core and closet switches, routers, wireless Aps and controllers are included in the JCC LAN WAN Program that refreshes this hardware as it approaches its manufacturer's end of support. Is the intent of this funding responsibility table to be a restructuring of the LAN WAN refresh program? Please clarify.	(Page 5): The LAN WAN refresh program is provided through the Judicial Council's Information Technology (IT) office and not its Facilities Services. Initial equipment for the LAN WAN is provided by the Judicial Council in new capital projects.
		Table A - Electrical, Item 18: Antennas / communication dishes is vague and requires clarification. Antennas or communication dishes installed to support a fire/life/safety system should be a Facilities Services responsibility.	(Page 5): If any antennas/communication devices are required for a fire and life safety system, then it is a Judicial Council Facilities Services' responsibility; otherwise, the trial courts are responsible for this cost.
		Table A - Electrical, Item 23: Unclear. CCTV is typically a component of the security system and should be included under Item 21, Security cabling	(Page 5): This has been clarified in the document, as CCTV has been moved under Item 21.
		Table A - Furnishings, Item 57: Garbage disposals are a fixed appliance. Why would existing garbage disposals not fall under the category of built-in amenities (Item 55).	(Page 7): If the garbage disposal is required to be provided by Building Codes, then it is a Judicial Council responsibility
		Table A - Furniture, Item 63: Limits fixed audience seating to bench-style. Many existing courthouses have fixed theater seats that are currently maintained by Facilities Services. Please clarify this line item applies to all fixed audience seating.	(Page 7): Under Item 63, fixed theater-style seating will be replaced on a limited basis as Judicial Council Facilities Services has moved to bench-style seating for full-courtroom replacements.
		Table A - Restroom, Items 145 - 154: In the proposed Table A, "fixed"	(Page 9): The restroom bath accessories listed

		<p>furniture and appliances continue to be a Facilities Services responsibility. Why are restroom accessories that are built-in or affixed to the wall different? Especially electric hand driers and soap dispensers that are being installed in new courthouses. Replacement of existing built-in and/or affixed accessories due to failure, damage or vandalism should continue to be funded by Facilities Services.</p>	<p>under trial court responsibility are <i>additional</i> to the same accessories provided by the Judicial Council.</p>
		<p>Table A - Restroom, Item 163: Baby changing tables are required by code and if affixed to the wall, should continue to be funded by Facilities Services.</p>	<p>(Page 9): Clarifying language has been added to Item 163.</p>
		<p>Table A - Electrical, Item 197: Unclear. Does this apply to new requests or O&amp;M on existing generators? In capital outlay projects, how will the JCC differentiate between system designs that were driven by cost, JCC standards, and site restrictions/limitations, and not court requirements?</p>	<p>(Page 11): This is for the new requests. IT systems and non-emergency systems do not get backup generator power and will not be funded by Judicial Council Facilities Services.</p>
		<p>Multiple categories listed in Table B are unclear and ambiguous. For example, components of a "complete" facility security system are funded by Facilities Services. A fully integrated security system consists of many components. Yet as referenced in Table B, it appears some will not be supported by Facilities Services. For example, hardwired duress alarm systems that are integrated with the security system are maintained by Facilities Services, but not wireless systems (many of which are integrated with the CCTV for camera call-ups). Additionally, building intrusion systems (item 26) are also integrated into the security CCTV system for camera call-ups. Please clarify what is constituted as a "facility security system" and why some components are maintained by Facilities Services and others are not.</p>	<p>Judicial Council only adds wireless duress alarm systems. If a new wireless duress alarm system is requested, or a supplemental wireless duress alarm system is added by a trial court, then it will be funded from Judicial Council Security Special Fund. Intrusion alarms are third-party services that trial courts will have to contract for. Judicial Council Facilities Services will not be contracting or paying for third-party services or their maintenance or repair.</p>
		<p>Table B - Communications &amp; Security, Item 9: The main difference between active and passive components is one requires an external source to its operation, the other does not. Considering this description, wouldn't an intercom system fall under the category of an "active" communication device? Please clarify what components are included under Detention Control - active communication.</p>	<p>(Page 13): Item 11 has been revised to reflect Judicial Council responsibility. Footnotes have been added to Items 10 and 11 to clarify the difference between passive and active communication.</p>

		Table B - Interview Rooms, Items 10 and 11: Description of "passive" and "active" communications in interview rooms is ambiguous. Please clarify	(Page 13): Footnotes have been added to Items 10 and 11 to clarify the difference between passive and active communication.
		Table B - Surveillance, Item 19: How will the JCC quantify the number of cameras that are in excess of standards?	For existing facilities, the addition of any new cameras is considered either through the Security Special Fund or Court Operating Funds. For new capital projects, the number of cameras provided is determined by the council's <i>California Trial Court Facilities Standards</i> , and additional locations are determined during the design of a capital project by Judicial Council Facilities Services.
		Table B - Does not address the public safety BDA / DAS. This system, as required by code, must be integrated with the building's fire control system and monitored. The monitoring, annual certification, and system maintenance should be included within Table B as a Facilities Services responsibility.	(Page 6): The installation of a Public Distributed Antenna System, required for the fire control system, is added as Item 40A in Table A as a Judicial Council Facilities Services responsibility.
6.	Jake Chatters, Court Executive Officer	<p><b>Superior Court of California, County of Placer</b></p> <p>Table A – Building Systems</p> <p>Line 16 – UPS</p> <p>Suggestion: Add a new line (16B) to clarify that a UPS (Hard Wired) is the responsibility of the JCC.</p> <p>The court agrees that small stand-alone UPS units for servers and other information technology systems are a court expense. However, a hard wired UPS for Communications and Security is part of the building infrastructure and should be consistent with Line 47, which makes clear that a hard wired UPS for Fire Life Safety is a JCC responsibility. Therefore, the court believes a new item for UPS (Hard Wired) for Communication and Security should be listed as a JCC's responsibility.</p>	<p>(Page 5): As shown in Item 16, any Uninterruptible Power Supply (UPS) system that is for IT systems or Communications (non-fire life safety system) is a trial court responsibility.</p> <p>(Page 6): Judicial Council Facilities Services is responsible for the hard-wired UPS required for fire and life systems.</p>

7.	Presiding Judge Kevin C. Brazile and Executive Officer/Clerk of Court Sherri R. Carter	<p><b>Superior Court of California, County of Los Angeles</b> On June 10, 2019, Chris Magnusson circulated the draft <i>Facilities Funding Responsibilities between Judicial Council and Superior Courts</i> for review. The comments of the Superior Court of Los Angeles County are as follow:</p> <p>The proposal should address solar panels (we note that it addresses electric car charging stations).</p>	Solar panels will be considered and prioritized accordingly by the TCFMAC, once the payback period is determined to be less than seven years.
		<p>Table A, item 2: power washing of hardscape. If this includes hazmat cleanup responsibilities (e.g., resulting from homeless encampments) then is a substantial and unsupportable cost shift.</p>	(Pages 10–11): Items 192 and 193 capture this, which is the responsibility of Judicial Council Facilities Services.
		<p>Table A, item 63 specifically references bench type seating, but should also include provision for like-kind replacement of audience chairs.</p>	(Page 7): Under Item 63, fixed theater-style seating will be replaced on a limited basis as Judicial Council Facilities Services has moved to bench-style seating for full-courtroom replacements.
8.	Alan Counts, Chief Deputy of Administration	<p><b>Superior Court of California, County of Riverside</b> General Comments:</p> <p>The draft does not clearly delineate how responsibilities have changed, the impact or the authority for the change. Trial Courts need to understand if there is a shifting of responsibility from the JCC for these facilities maintenance costs. Recommend the draft be revised to show the following:</p>	Tables A and B have been updated at the request of the Court Executives Advisory Committee (CEAC), which are attached.
		<p>Currently Responsible: Change of Responsibility to: Fiscal Impact of Change: Authority for the Change:</p> <p>Recommend a clarification be added to confirm assumption items listed in the Facilities Services column are funded by Facilities Services but it is anticipated the actual work is to be completed by a Service Provider, Court staff using delegated funds or using the Facilities Modification process.</p>	Clarification has been added to the document.

		<p>Maintenance, repair or replacement of any statutory, certification or code complaint requirements should be the JCC’s responsibility as the building owner. For example, electric car charging stations are required for the public by Cal Green or Distributed Antenna System (California Building Standard Code, Title 24, Part II).</p>	<p>Any systems in new buildings, which are constructed through a capital and required by applicable building code, is a Judicial Council responsibility. This situation does not apply to existing buildings. 		Item 2 - JCC Security Special Fund: If installed at construction it should be a JCC responsibility	(Page 13): Judicial Council only provides hardwired duress alarm system. No wireless duress alarm system is provided by Judicial Council. For any existing wireless duress alarm system, the system is subject to Security Special funding.
		Item 4 - Facilities Services: If installed at construction it should be a Facilities Services responsibility	(Page 13): Access control systems are maintained and used by trial courts with no input from the Judicial Council. Access control systems remain a trial court responsibility.
		Item 9 - Facilities Services: If installed at construction, it should be a Facilities Services responsibility	(Page 13): This has been corrected, as it is a Judicial Council responsibility.
		Item 11 - Unknown: Need clarification as to what Active Communication means for these interview rooms	(Page 13): This has been corrected, as it is a Judicial Council responsibility.
		Item 15 - Unknown: Clarify or provide example of what is stand alone plugged equipment?	(Page 13): These are enhancements, add-ons or additions to existing screening equipment (magnetometer). For example, a gun powder residue check machine or micrometer wave checking machine, which are not provided by Judicial Council Facilities Services, is a trial court responsibility.
		Item 17 - Others: TC does not provide Gun Safes – should this be “by others”?	(Page 13): An <i>Others</i> column has been included in the table to better clarify funding responsibility of items such as this.

9.	David Yamasaki Court Executive Officer	<b>Superior Court of California, County of Orange</b> Dear TCFMAC members: Thank you very much for extending the opportunity for the submission of comments regarding the draft document detailing the proposed assignment of financial responsibilities for the continued maintenance of court facilities. Over-all, the document is very well assembled and, in my view, details very reasonable responsibilities between trial courts and the Judicial Council. That said, I believe there is a need to add the assignment of responsibilities pertaining to the ongoing certification and maintenance requirements regarding Distributed Antenna Systems (DAS) and Bi-Directional Amplifiers (BDA's) that are critical and mandatory for the operation of court facilities. Below are further reasons to support modifications to language contained in the draft document.	(Page 6): Distributed Antenna Systems for fire protection has been added under Item 40A in Table A and is a Judicial Council Facilities Services responsibility.  Bi-Directional Amplifiers (BDAs), if required for fire protection, is a Judicial Council Facilities Services responsibility.

		<p>Effective communications systems are critical for the effective and safe operation of our trial courts. Especially for new court construction projects, the costs associated with installing telephone systems and networking equipment has, very appropriately, been delegated to trial courts to install and maintain. There is, however, a very significant distinction concerning communication equipment that is necessary to enable communications for emergency purposes. Equipping court facilities with Fire/Life/Safety features such as: fire detection; sprinklers; fire rated stairwells; and DAS/BDA systems are components that are required for all new construction and are funded using court construction funds. Furthermore, regarding the latter, the systems must be certified on a regular basis. The cost of doing so can amount to approximately \$10k annually.</p> <p>As expressed earlier, with the exception described, the over-all content of the document are very detailed with delegated responsibilities appropriately suggested. Should there be a need for additional clarification, I would be more than willing to provide details if requested.</p>

		<p>3. Any statutory or code compliant requirements should be the Judicial Council’s responsibility as the building owner. For example, electric car charging stations are required for the public by Cal Green (California Building Standard Code, Title 24, Part II).</p>	<p>Facilities that have required building code-related items are the responsibility of Judicial Council Facilities Services.</p>
		<p>4. Generally, anything pertaining to the exterior of buildings or located outside the building envelope (parking lots, exterior shell, windows, generators, HVAC, roofs, etc.) the installation, replacement or maintenance should be the responsibility of the building owner.</p>	<p>The draft Guidelines align with this statement.</p>
		<p>5. Generally, there should be a statement regarding anything related to emergency response, safety certifications, or emergency monitoring should be maintained by the owner of the building.</p>	<p>Same comment as above.</p>
		<p><b>Fiscal and Operational Impacts</b></p> <p>The working group has provided comments given the shortened time frame but was not able to complete a thorough review of impact to trial courts that may be associated with changes and additions to the draft. 		<p>Item 2: Building Envelope-FS: This should be a FS responsibility as window cleaning equipment must be certified at least twice a year.</p>	<p>(Page 5): Building cleaning equipment provided for a high-rise building is certified by Judicial Council once a year as required by applicable statutes. Inspection will follow at six-month intervals.</p>
		<p>Item 4: Building Envelope-FS: This should be a FS responsibility. Clearing of cobwebs on the exterior of the building should be included in the “Pest Control” section of this document in items 170-173 as a FS responsibility. Interior cobwebs would generally be covered under janitorial contract. Exterior cobwebs would not. Instead, they align better in the pest control function. Some areas of the courthouse may be inaccessible to janitorial contractors.</p>	<p>(Page 5): Exterior window cleaning is clarified to be Judicial Council cost. Because current funding does and will most likely continue to lag demand, O&amp;M projects and facility modifications that are the responsibility of and funded by the Judicial Council will be prioritized in alignment with the council’s <i>Trial Court Facility Modifications Policy</i>.</p>
		<p>Item 15: Electrical-Both: Server room electrical requirements should be clarified. It is usually part of construction. If related to construction and functionality of electrical requirements within the building/IDF/MDF it should be a FS cost. If there are post construction costs associated with new servers, it should be a TCOF cost.</p>	<p>(Page 5): Item 15 pertains to existing facilities and not new construction. Any new outlet or relocation of an outlet unless required by a Priority 1 or Priority 2 FM is a trial court responsibility.</p>
		<p>Item 16: Electrical-Both: UPS powers many functions in a courthouse and is usually part of construction. If related to construction and functions of the building should be FS, if related directly to CMS or other court added function, should be TCOF. It should also be noted that the same UPS may not only operate IT services but also other critical services within the building such as elevators, security cameras, security systems, building automation, etc.</p>	<p>(Page 5): As shown in Item 16, any UPS system that is for IT systems or Communications (non-fire life safety system) is a trial court responsibility.</p> <p>(Page 6): Judicial Council Facilities Services is responsible for the hard-wired UPS required for fire and life systems.</p>
		<p>Item 17: Electrical-Both: Disagree with percentage of cost of the network assigned as indicated by the footnote: Courts 80%, Judicial Council 20%. How was percentage calculated? Given Converge Network is the backbone of many integrated systems the majority cost</p>	<p>(Page 5): The footnote for Item 17, Integrated Network, has been revised to better define the cost responsibility between the Judicial Council and trial courts.</p>

Provide clarification for this item.</p>	<p>(Page 5): If antennas/communication devices are required for a fire and life safety system, then it is a Judicial Council Facilities Services responsibility; otherwise, it is a trial courts responsibility.</p>
		<p>Item 30: Electrical-Both: Provide clarification for this item. If related to construction, electrical outlets should be part of the cost of the building as a FS cost. If adding an outlet to an existing building and not required under code, then it should be a TCOF cost.</p>	<p>(Page 6): The addition of new power outlets in an existing facility under Item 30, for items such as kiosks, digital signage, or other equipment, is a trial courts responsibility.</p>
		<p>Item 36: Electrical-Both: This was addressed by the policy in 2014. Need to differentiate between those stations installed during new construction or as a future add. Depending on this, both FS and TCOF may need to be checked. However, the policy should be reevaluated as a FS responsibility in new courthouses. This item also helps new buildings with LEED certification.</p>	<p>(Page 6): If the electrical car charging stations are required either as a part of LEED certification or required by the applicable building code in a new capital project, then that is a Judicial Council’s Facilities Services responsibility. 		2014. Need to differentiate between those stations installed during new construction or as a future add. Depending on this, both FS and TCOF may need to be checked. However, the policy should be reevaluated as a FS responsibility in new courthouses. This item also helps new buildings with LEED certification.	
		Item 52: Flooring-FS: Provide clarification for this item. This should be a FS responsibility if raised flooring is used in new projects for ramping in courtrooms to mitigate construction costs.	(Page 6): If the raised floors are used to reduce construction costs in a capital project, then it is a Judicial Council Facilities Services responsibility.
		Item 79: HVAC-FS: This should be a FS responsibility as janitorial are not allowed in restricted areas.	(Page 7): This is a trial court responsibility, and if the system is located in a restricted area, then it should be coordinated by the trial court.
		Item 80: HVAC-FS: This cost should be aligned with FS as janitorial contractors are often prohibited from restricted/in- custody areas.	(Page 7): This is a trial court responsibility, and the trial courts should coordinate with the Sheriff department for after-hours cleaning.
		Item 97: Interior Finishes-FS: This should be a FS responsibility. Manual blinds and shades as part of new construction are the responsibility of the building owner, JCC or as a shared cost in a county building.	(Page 8): Manual blinds, drapes and shades in chambers and courtrooms are a trial court responsibility. This also includes any manual movable partitions or cubicle partitions.
		Item 102: Interior Finishes-FS: Paneling is a permanent fixture when in place at time of construction and is the responsibility of the building owner, JCC or a shared cost in a county building. If an added feature by local court, it is the court responsibility.	(Page 8): If this is part of new capital construction, then it is a Judicial Council Facilities Services responsibility. However, in normal course of wear and tear, this would not rise to the higher Priority 1 or 2 FM and would be deferred pending adequate funding.

11.	Michael Roddy Executive Officer	<p><b>Superior Court of California, County of San Diego</b></p> <p>Dear Members of the Trial Court Facilities Modification Advisory Committee:</p> <p>I am writing to provide public comment on behalf of the San Diego Superior Court to the draft <i>Facilities Funding Responsibilities between Judicial Council and Superior Courts</i>. This draft was circulated by Facilities Supervisor Chris Magnusson on June 10, 2019. We do not believe that this draft proposal should move forward without more analysis and direct discussion with trial courts on the impacts to local trial court budgets.</p>	
		<p>Before getting into some specific issues that we have with this proposal, as a general matter, it appears that this draft is intended to not only define the facilities operations and maintenance responsibilities (and funding) between the Judicial Council and trial courts, but also to shift what have been Judicial Council/State responsibilities onto the trial courts. Clearer definitions between the parties is a good step. Shifting responsibilities in the way it is being attempted here is not a good step. We have had to piece together information from multiple sources to try to better understand what currently exists versus what is being proposed. The realignment of state and local responsibilities and costs is a potentially significant funding change that imposes new, unfunded costs on already overburdened local trial court budgets.</p>	<p>The TCFMAC does not intend to recommend the Guidelines for Judicial Council review/adoption, as they do not reapportion fiscal responsibilities between the Judicial Council and trial courts but clarify current responsibility for costs for systems, components, and equipment of capital, O&amp;M, and FM projects.</p>

		<p>With regard to the proposed changes in the matrix. A representative sample of specific items that stand out include:</p>	
		<p>File Tracking System: It is difficult to understand what this item refers to without any detailed description. In our Central Courthouse, the Judicial Council's facility staff have loosely defined the electrified high-density filing system as "File Tracking Furniture System"; and it is their position that our court is responsible for the maintenance and repairs of the units. The installation of these high-density filing units involved the architect, structural engineer and general contractor to design and reinforce the floor slabs for the additional equipment weight, and the electrical engineer to provide the NEMA 5- 20P dedicated electrical connections. Based on the special structural and electrical construction, it is inaccurate to define the electrified high-density filing units as "Furniture". It is also not appropriate to shift the maintenance and repair responsibility of the units to the Superior Court. When the Judicial Council project management team</p>	<p>(Page 2): A File Tracking System is used by the trial courts, and the use of the system triggers irregular maintenance obligations. It is a furniture system and therefore is a trial court responsibility.</p>
		<p>reduces the courthouse square footages on new projects and suggests that to make up for lost areas with electrified high-density filing units, courts need to be clearly informed, up front, that the funding responsibility for the maintenance and repairs of the units will be placed on Superior Court.</p>	<p>Agree with the comment. The Guidelines will be distributed to all trial courts engaged in capital projects to ensure they are advised during the project's design phase.</p>
		<p>Antennas/Communication Dishes: Currently our court does not use or maintain any antennas or communication dishes in any of our courthouses. It is not appropriate to shift the responsibility of these items to the trial courts.</p>	<p>Judicial Council Facilities Services does not install any antennas or communication dishes. If a trial court is installing any such equipment, it is the responsibility of the trial court.</p>
		<p>Carpet Maintenance and Repair: In both Judicial Council-managed buildings and County-managed buildings, common spaces are shared</p>	<p>Any tripping related repairs is performed by Judicial Council Facilities Services.</p>

		<p>by various tenant county and court departments. It has always been the landlord's responsibility to maintain and eliminate any tripping hazards in common lobbies and corridor areas. It is not appropriate to shift this responsibility to the trial courts.</p> <p>Flooring Covering Maintenance and Repair: The Judicial Council has always taken care of the repairs and replacements of broken and bulged up floor tiles in lobbies, corridors and restrooms. The reasons for floor tile failures can range from structural slab issues, water seepage, poor tile installation, bad tile adhesive or mastic, etc. The floorcovering failure areas can occur in common spaces shared by Judicial Council and the County. Local trial courts do not have the ability to negotiate and maintain these types of issues. It is not appropriate to shift the responsibility to the trial courts.</p>	<p>However, because of lack of funding, the trial courts may pay for carpet replacement pursuant to the council's <i>Court-Funded Facilities Request Policy</i> and rule 10.810 of Rules of Court.</p> <p>Any tripping related repairs or any floor failures because of non-regular wear and tear is performed by Judicial Council Facilities Services. However, because of lack of funding, the trial courts may pay for the replacement of floor tiles pursuant to the council's <i>Court-Funded Facilities Request Policy</i> and rule 10.810 of Rules of Court.</p>
		<p>Garbage Disposals: Garbage disposals are connected to the building plumbing and electrical systems, therefore it is not appropriate to shift the responsibility to the trial courts.</p> <p>Trash Compactors: There are no trash compactor appliances in the San Diego Superior Court operational spaces. It should be clarified that trash compactors for the buildings (generally located at the loading dock areas) are the Judicial Council's responsibility to manage and maintain.</p> <p>Rekeying (due to loss): It should be clarified that if the cause for lost keys is due to the Judicial Council staff or their contractors, the Judicial Council would be responsible for rekeying the courthouse.</p>	<p>If the garbage disposal is required to be provided by Building Codes, then it is a Judicial Council responsibility</p> <p>If trash compactors are provided as a part of the new capital project, it is maintained by the Judicial Council. 		<p>Additional Data Room Air Conditioning Systems over the Provided Existing System: This title does not make sense to use. The Judicial Council is currently responsible for providing functional air-conditioning in the Data Room so data equipment will not heat up or burn up. If the Judicial Council keeps the Data Room within its required temperature range, then no additional air-conditioning would be required. 		Active Communication (in-custody interview rooms): The Judicial Council has always maintained and repaired the in-custody/attorney interview intercom systems. Our IT technicians do not have the expertise or access into the holding areas to perform maintenance or repair work. It is not appropriate to shift this responsibility to the trial courts.	(Page 13): Same comment as above.
		Digital Video Recording (DVR) as Components of Complete Security System and Plan: the Judicial Council needs to provide the details on the number of days/months and video resolution capabilities that the surveillance video recording system will provide. The Sheriffs Department of each Superior Court should have the opportunity to review the DVR recording information and provide their recording capacity requirements. Having to currently deal with a DVR recording system whose storage capability is completely inadequate, it is clear to us that this item requires more detail and a review/comment process for trial courts to ensure that acceptable and necessary systems and storage are provided.	<p>(Page 13): These video surveillance systems are installed for the benefit of the courts and their security providers with the goal of increasing their situational awareness in and around court facilities. Video surveillance equipment is designed to be a force multiplier for the security provider by placing cameras in locations where security staff is not always physically present. The primary use of these systems is not as evidence collection tools or aids to court proceedings, but to identify incidents or potential incidents in progress, allowing for a preventative or reactive security response, and to provide a reasonable timeframe during which the recorded video of these incidents can be reviewed and/or retained.</p> <p>The Judicial Council has increased the standard data retention time from 7 to 30 days. It has been the experience of the Judicial Council that 30 days of video footage is sufficient in the vast majority of cases where past footage is required for</p>

			investigative purposes. It should also be noted the California judicial branch is not subject to the same statutory requirements for data retention as are county and city governmental entities. Current standards include resolution requirements that meet or exceed industry standards for HD cameras.
		We believe that this proposal is a potentially significant change in the responsibilities and relationship between the Judicial Council's Facilities Services Division and the Superior Courts. Much more work and discussion should occur, especially when the result of this change would be to let the State and the state general fund off the hook for facilities maintenance and repair costs, while placing new unfunded burdens on the operational budgets of the local trial courts.	The TCFMAC does not intend to recommend the Guidelines for Judicial Council review/adoption, as they do not reapportion fiscal responsibilities between the Judicial Council and trial courts but clarify current responsibility for costs for systems, components, and equipment of capital, O&M, and FM projects.
		<p>Shifting facility maintenance and repair costs onto the trial courts, without any mechanism to add sufficient funding to court operational budgets to cover these increased costs, will force trial courts to choose between providing court access and services to the public and maintaining safe and adequate state facilities. This is not a choice that should be pushed onto local trial courts without a great deal more analysis and discussion.</p> <p>Thank you for the opportunity to provide our comments.</p>	Same comment as above.
12.	Karen Dixon, Judge	<p><b>Superior Court of California, County of Siskiyou</b> We are unable to properly respond to the draft because there is insufficient descriptive explanation as to the items entered on the list under A and B as well as under section A. Capital Cost Responsibilities. It is also unclear whether there will be a difference in funding responsibilities depending upon whether the building is new or modification, etc. For instance, under section A, the table demonstrates that the audio recording equipment used to tie into a new system is the responsibility of the trial</p>	Section A of the draft Guidelines applies to new capital construction projects, and Section B applies to existing facilities maintenance and repair.

		<p>court. Our new courthouse is currently being built. Many of the recording equipment contemplated is to be installed per Judicial Council requirements. Is there an additional cost to our court to purchase equipment not installed? Is the trial court responsible for the costs of the equipment to be installed aside from the new facility funding provided for such costs? Further, it appears that much of the exterior maintenance as described in Table A, specifically numbers 2, and 5, has been shifted from Facilities Management to the trial courts. I hope that you are able to provide such information so we may properly respond to the draft. Thank you for your assistance.</p>

# Guidelines for Prioritizing and Ranking Facility Modifications

---

ADOPTED BY  
THE TRIAL COURT FACILITY  
MODIFICATION ADVISORY COMMITTEE,  
APRIL 13, 2015

JUDICIAL COUNCIL  
OF CALIFORNIA

---

TRIAL COURT FACILITY MODIFICATION  
ADVISORY COMMITTEE

## 1. Overview

This document presents a methodology and process adopted by the Trial Court Facility Modification Advisory Committee (Advisory Committee) for prioritizing and ranking facility modifications to trial court facilities. It also includes operating guidelines established to help guide Advisory Committee meetings and to establish JCC versus court funding for a variety of facility related issues.

## 2. Facility Modification Defined

Facility Modifications (FM) as defined by the Judicial Council in its [December 2, 2005, report titled Prioritization Methodology for Modifications to Court Facilities](#) are a generally emergency, physical modification to a facility component or components that restores or improves the designed level of function of a facility or facility components. On December 12, 2014, the Judicial Council (JCC) adopted a revised version of the policy titled [Trial Court Facility Modifications Policy](#).

A facility modification may consist of:

- A modification that alters or increases the designed level of services of a building;
- A “special improvement” meaning a one-time modification to a facility that is not expected to be repeated during the lifetime of the facility;
- An alteration, addition to, or betterment of a facility that changes its function, layout, capacity, or quality;
- A rehabilitation, which restores a facility to its former state or capacity;
- A renovation, which restores a facility to a former or better state, including by repairing or reconstructing facility components;
- A replacement, which puts a new facility component of the same or better quality or function, in the place of an existing facility component;
- The addition of new systems, equipment, or components to a facility that would not otherwise exist;
- A modification to a facility that is required to bring the facility into compliance with law, including but not limited to the Americans with Disabilities Act, title 24 of the California Code of Regulations, and federal and state hazardous materials laws and regulations;
- Any of the foregoing where a facility or its components are damaged, seriously deteriorated, dysfunctional, subject to intermittent service outage, or otherwise in insufficient operating condition as a result of deferred maintenance, emergency, acts of God, severe wind or weather conditions, vandalism, or criminal activity; and
- A correction of collateral damage arising from an emergency incident or unanticipated finding that is discovered during the performance of facility modification work.

A facility modification differs from routine maintenance and repair of a court facility, which is the routine, recurring, and generally anticipated work that must be performed periodically throughout the life of a facility to keep the building and its grounds, equipment, and utilities

infrastructure in a condition adequate to support their designed level of service. Routine maintenance and repair includes annual or more frequent periodic repairs and replacements of building components and equipment consistent with manufacturers' recommendations or industry-recommended service cycles. While a facility modification may either restore or improve a facility's designed level of function, routine maintenance and repair always maintains, without materially improving, the facility and its components at their designed level of function. Routine maintenance and repair is the basic and ongoing work that is needed, as part of ordinary facility operation and management, to keep the facility and its components in a condition adequate to support existing facility operations and to prevent deterioration, break down, and service interruptions.

In some instances, it is difficult to distinguish between a facility modification and routine maintenance and repairs. Facility modifications are distinguished from routine maintenance and repair based on the scope and complexity of the work to be performed, and the anticipated impact of the work on the ongoing operation of the facility. Factors to be considered in evaluating the scope, complexity, and impact of a project include:

- The amount of time and materials needed to complete the work;
- The number of steps involved in completing the project;
- The type and number of tools required to perform the work;
- The extent to which facility structures or equipment must be altered or moved to complete the project;
- Whether the facility component involved is a substantial part of a major facility system;
- Whether one or more facility systems will be disrupted or taken out of service as a result of the project; and
- Whether the project involves critical facility systems such as life safety or security equipment, HVAC equipment, utilities infrastructure, roofs and other structural components, or accessibility features (i.e., elevators, escalators, doors, parking lots and structures).

Projects of greater scope and complexity or with a more critical impact on the ongoing safe and secure operation of the court facility are more likely to be facility modifications; however, for projects that are more difficult to distinguish, case-by-case evaluation is required.

There is no upper or lower dollar limit for FM. Small repairs will normally be handled as Job Orders but depending on the operations and maintenance budget, some smaller repairs either individually or collectively may need to be funded as FMs. Larger projects may be funded as Capital Projects.

A facility modification is distinguished from a capital project in that the latter significantly increases the facility's gross area; substantially renovates the majority (more than 50 percent) of the facility; involves the construction of a new facility or a facility acquisition; or changes the use of the facility, as in a conversion from another use to court use.

### 3. Priority Categories

Facility modifications are assigned one of six priority categories. These categories, adopted by the Judicial Council, are based on methods commonly used by private sector facility management firms. Facility modifications that are determined to be Priority 1 will be addressed immediately and regardless of whether the court occupies a shared-use facility. Planned Priority 2–6 facility modifications requested for court exclusive and shared-use facilities will be assigned an appropriate priority category. Implementation of modifications in shared-use facilities, however, may be dependent on financial participation by the county that occupies space in the building.

**Priority 1—Immediately or Potentially Critical.** Condition requires immediate action to return a facility to normal operations, or a condition that will become immediately critical if not corrected expeditiously. Such conditions necessitate the need to stop accelerated deterioration or damage, to correct a safety hazard that imminently threatens loss of life or serious injury to the public or court employees, or to remediate intermittent function and service interruptions as well as potential safety hazards. Such conditions may include, but are not limited to, the following: major flooding; substantial damage to roofs or other structural building components; or hazardous material exposure. Depending on scope and impact, a severe deterioration in life safety protection may also be considered a priority 1 condition requiring a facility modification.

Owing to their critical nature, priority 1 requests will be addressed immediately by JCC staff using internal procedures that ensure timely and effective responses to unplanned emergency or potentially critical conditions, including a method and a process for setting aside funds to address priority 1 conditions.

**Priority 2—Necessary, but Not Yet Critical.** Condition requires correction to preclude deterioration, potential loss of function or service, or associated damage or higher costs if correction is further deferred.

**Priority 3—Needed.** Condition to be addressed will reduce long-term maintenance or repair costs or will improve the functionality, usability, and accessibility of a court. The condition is not hindering the most basic functions of a facility, but its correction will support improved court operations.

**Priority 4—Does Not Meet Current Codes or Standards.** Condition does not conform to current code requirements, yet it complied at the time of initial construction. Such conditions are considered legally nonconforming and are generally not required to be modified to meet current code requirements.

**Priority 5—Beyond Rated Life, but Serviceable.** Condition is currently adequate but cannot be expected to function as designed in the future.

**Priority 6—Hazardous Materials, Managed but Not Abated.** Hazardous materials, such as asbestos or lead-based paints, which are currently managed in place but not yet remediated.

## 4. Ranking Requests for Priority 2–6 Facility Modifications

JCC staff will work with Trial Court Executive Officers and their staff to document the court’s operational needs. Facility conditions will be assessed by JCC staff and contractors periodically to identify facility modification requests and requirements for each forthcoming fiscal year. JCC staff will assign a priority category to each modification requested or indicated, develop a preliminary cost estimate, and determine a high-level scope of work for the facility modification. JCC staff will then prepare a report for each committee meeting on pending trial court facility modifications.

Each periodic report will include a preliminary ranked list of all pending requests by priority category, including a quantitatively-scored rationale for the ranking. Preliminary ranked lists of all facility modification requests will be prepared by JCC staff based on criteria outlined in the July 27, 2012, Judicial Council adopted policy on facility modifications. The policy outlines the priority categories; specific justifications; effect on court operations and public/employee safety; risk management and mitigation; funding availability; equity among the courts; implementation feasibility; cost/benefit analysis; design and plan status; and planned major capital improvements. JCC staff will provide scoring on the following seven facility modification components, which incorporates the criteria outlined in the policy:

1. **Priority Category:** As defined above, this will be used to create the initial ranking of facility modifications. By assigning point values to the criteria listed below, a score is produced to rank the facility modifications within each priority category.
2. **Justification and Effect on the Court:** This will be a score between 5 and 50 (with 5 indicating the court is closed or is significantly impacted and 50 indicating this is a wish list item). *Please note that any number between 5 and 50 can be used to quantify the justification and the effect this requirement has on the court.* The chart below will assist in determining the correct number. Equity among courts can be taken into consideration when assigning appropriate values below.
  - 5-15 court operations are *significantly* impacted (negatively)
  - 16-20 court is operating but at less than standard productivity
  - 21-35 court appearance and dignity is diminished by the condition of the facility
  - 36-50 a “wish list” item
3. **Safety, Security, Risk Management:** This will be a score between 5 and 25 (with 5 indicating there is a potential for serious risk and 25 indicating there is no risk) The focus here is on safety, security, and risk management/mitigation by taking into consideration public and employee safety. *Please note that any number in between 5 and 25 can be used to quantify the effect this requirement has on the court.* The chart below will assist in determining the correct number.
  - 5-15 potential serious risk
  - 16-20 no significant risk
  - 21-25 no risk

Facility Modifications that are for the express purpose of enhancing court security systems and functions may have an evaluation performed by the JCC Office of Security. Once a project is ranked using the standard methods, means, and interpretations, The Security scoring matrix below will be applied against the final ranked score. For this specific class of

project the above scoring method will only be interpreted as a score associated with the Safety and Risk Management aspects of the project.

4. **Feasibility:** This will be a score of 10, 15, 20, or 25 (with 10 indicating the project is easy to perform and 25 indicating the project requires major design efforts and may not be practical to perform). Factors to consider when assigning a score are shared-costs with Counties, permitting issues, funding availability, design and plan status, court approvals, and fire plans.
  - 10 Easy to perform with little/no planning or design
  - 15 Requires some planning and design
  - 20 Requires major design effort or shared cost difficult to receive
  - 25 Requires major design effort, may not be practical, shared cost highly unlikely
  
5. **Cost/Benefit:** This will be a score based on the Simple Return on Investment (ROI) value associated with the project. Deduction will be 3 points for each year of ROI less than seven creating a potential score of between -21 and -3.. This criterion allows for facility modifications that will pay back the cost of the effort over shorter time frames to move up the list by using a negative score. An energy-saving improvement yielding reduced utility bills or an automation project resulting in a demonstrable reduction in labor expenses are good examples. Project documentation must be validated by utility analysis staff.
  - 0 ROI in excess of 7 years
  - -3 ROI of 7 years
  - -6 to -21 ROI of 6 to 1 year
  -
  
6. **Design Status:** This will be a score of 5, 15, or 25 (with 5 indicating the project is designed and ready to perform today, and 25 indicating the designs will take more than 90 days to complete). Facility modifications that require no design effort, or are already in design, will receive higher scores than those still requiring design effort.
  - 5 Designed, ready to perform today
  - 15 Designs will be ready within 90 days
  - 25 Designs will take more than 90 days to complete
  
7. **Planned Major Capital Improvements:** This will utilize a yes/no test for *implementation* of a facility modification project, though this will not affect the ranking of those facility modifications requests or needs. A facility modification may be implemented even though a major capital project that would address the need, but is not funded. If a planned major capital project will address the facility modification need in a reasonable period of time, the request may not need to be implemented. A specific funding guideline is included in Attachment 1 as Guideline 10.

## 5. Budget Allocation

Prior to the commencement of the fiscal year, JCC staff will produce a proposed spend plan detailing projected expenditures and plans of approach to plan, allocate and expend the anticipated FM budget in the forthcoming year. This proposal will be presented to the advisory committee including allocations for the following categories:

1. Statewide Facility Modification Planning
2. Priority 1 Facility Modifications Allocation
3. Planned Facility Modifications Allocation
4. Priority 2-6 Facility Modifications Allocation

The methodology and process used to produce the proposed budget allocation will be reviewed with the Advisory Committee to evaluate the approach and answer any questions. The Advisory Committee will have the opportunity to modify the prioritization ranking methodology, adjust the allocation of the facility modifications budget among the four categories, make other changes as necessary, or validate the methodology adopted and budget allocation proposed by JCCJCC staff.

Upon approval of the final draft proposal staff will submit the budget proposal to the Judicial Council in alignment the requirements of the FM Policy.

## **6. Implementation of Approved FM Budget**

JCC staff will proceed to implement facility modifications using the Council approved FM budget allocations. JCC staff will manage the work through design, construction, inspection, and acceptance. The JCC will work collaboratively with local courts to implement all facility modifications.

JCC staff will prepare a prioritized project lists in alignment with section 4 of this document prior to each committee meeting.

The Advisory Committee will meet approximately every 45 days to review facility modifications for Priority 1 emergency, unforeseen/out-of-cycle Priority 2-6 requests.

JCC staff will provide regular reports to the committee regarding project approved expenditures compared to original approved budgets. Staff will make recommendations as necessary to the committee to adjust budget allocation pursuant to their authority in order to maximize appropriate utilization of FM funding over the course of the fiscal year.

The Advisory Committee's decisions are normally implemented by the JCC without further consideration or approval. Reconsideration of decisions made by the Advisory Committee will only be reviewed in accordance with Guideline 1 located in Attachment 1.

In the event a facility modification can be performed using funds from sources other than the facility modifications budget, implementation without regard to the prioritization and ranking methodology may be considered by the Advisory Committee. An example would be the provision of grant funds for the purchase and installation of security equipment. If facility modification funds were required to complete the installation of any equipment, provided it was a Priority 1 facility modification, the installation would still be eligible to proceed without ranking. If the modification was classified as a Priority 2 or higher, it would be subject to the ranking methodology.

## 7. JCC VERSUS COURT FUNDING

Not all request for facility related services are funded though the JCC facility modification budget. Some items such as furniture are expressly excluded while others such as painting and floor covering are only funded under certain circumstances. To help establish a predictable outcome when requesting facility work the Advisory Committee has established a number of Guidelines cover a variety of areas. The full text of the guidelines is included as Attachment 1. The guidelines cover the following topical areas:

- Guideline 1: Request for Reconsideration of Advisory Committee Decisions
- Guideline 2: Paint/Wall Covering and Window Covering
- Guideline 3: Floor Covering
- Guideline 4: Special Purpose HVAC
- Guideline 5: Security Related Projects
- Guideline 6: Hazardous Material Management and Disposal
- Guideline 7: Patron Seating
- Guideline 8: Installation and Support of Court Owned Equipment/Furniture
- Guideline 9: Art, Interior Decorations, and Special Purpose Decorations
- Guideline 10: Facility Modifications in Facilities to be Replaced with Funded Capital Projects
- Guideline 11: Funding of Facility Modifications in Court-Funded Leased Facilities
- Guideline 12: Americans with Disabilities Act (ADA) Project Guidelines
- Guideline 13: Using Cost to Assist in Facility Modification Determinations
- Guideline 14: Vandalism/Graffiti Mitigation
- Guideline 15: Court-Funded Facilities Requests
- Guideline 16: Charging Stations for Electric Vehicles
- Guideline 17: Building and Security Systems Funding Responsibility

The Advisory Committee may establish additional Guidelines or modify existing guidelines as necessary to achieve the goal of the Judicial Council, consistent with budget restraints.

## 8. Advisory Committee Meeting Protocols and Other Guidance

**Cost as a Prioritizing and Ranking Factor:** The cost of a FM will not be a factor when prioritizing and ranking FMs.

**\$15/5 Rule:** FMs with a Priority 2 or 3 and a cost of less than \$15K, and FMs with a Priority of 4 or 5 with a cost of less than \$5K can be approved and funded by the facility modification program budget without first going through the Advisory Committee. All \$15/5 Rule facility modifications will be limited to \$100,000 annually for each 100,000 square feet of space per facility. For example, an 80,000 square foot facility is limited to \$100,000 and a 120,000 square foot facility is limited to \$200,000.

All such FMs will be reported to the Advisory Committee at the next meeting and will be funded using Out of Cycle funds. Approval thresholds will be adjusted based on committee approval and budget limitations.

**Facility Modification Cost Increases:** Facility modification cost increases do not have to be approved by the Advisory Committee in advance. Cost increases of more than \$50K over that initially approved budget, by the Advisory Committee, will be reported at the next meeting.

**Meeting Materials for the Advisory Committee:** Meeting materials for the Advisory Committee will include an Executive Summary, an agenda, a cumulative list of policy decisions, PowerPoint slides, and facility modification lists. Meeting materials for the Advisory Committee will be sent out at least five business days prior to the meeting. The PowerPoint slides should be sent in black and white and handouts formatted as three slides per page.

**Notice of Meetings for the Public:** A meeting notice and an agenda with a brief description of each item to be considered during the meeting will be posted to the California Courts website ([www.courts.ca.gov](http://www.courts.ca.gov)) at least five business days before the meeting. (CRC 10.75(e) (1).) The meeting notice must state whether the meeting is open or closed and, if partly closed, which agenda items are closed. For meetings that are open in part or in full, the meeting notice must provide: (1) the telephone number or other electronic means that a member of the public may use to attend the meeting; (2) the time of the meeting, whether the public may attend in person, and, if so, the meeting locations; and (3) the email address or other electronic means that the public may use to submit written comments regarding agenda items, requests to speak at a meeting, or requests to make an audio recording of a meeting. (CRC 10.75(f).)

**Meeting Materials for the Public:** Meeting materials provided to the public will be posted to the California Courts website ([www.courts.ca.gov](http://www.courts.ca.gov)) at least three business days before the date of the meeting, except in extraordinary circumstances. (CRC 10.75(h).)

**Members Absences:** In the event a member cannot attend, they cannot have someone else represent them at the meeting. A quorum will consist of the members present for a scheduled meeting.

## **Guideline 1**

### **Requests for Reconsideration of Advisory Committee Decisions**

Courts and the JCC may request a decision made by the Advisory Committee be reconsidered. Such requests could address funding, prioritization, or scoring decisions. All such requests must be in writing and signed by the Presiding Judge or Court Executive Officer or if from the JCC, the Director of the Office of Real Estate and Facilities Management (OREFM). Request for reconsideration should be submitted to the Facility Operations Manager of OREFM.

The Facility Operations Manager will forward the request to the Chair of the Advisory Committee along with a summary of the request and the decision made by the Advisory Committee.

The Advisory Committee will review the request for reconsideration, the initial decision of the Advisory Committee, and any other pertinent information related to the request. The Advisory Committee or a member, may based on the situation visit the facility, meet with court and/or JCC personnel, or meet with any other person(s) who may provide information on the request.

The Advisory Committee will then review all the data and the report from the appointed member and make a final determination. The Chair will prepare a reply informing the requestor of the decision of the Advisory Committee.

The decision of the Advisory Committee is considered final.

## **Guideline 2**

### **Paint/Wall Covering and Window Covering**

The JCC has the responsibility for the interior painting and maintenance of wall/window coverings. Rule 10.810 (See Attachment 2) allows the courts to use their operating funds for painting and wall/window coverings, but does not require them to fund the maintenance to a JCC standard. Thus if the court is not willing or able to fund this to meet the JCC standard of finish and appearance the JCC as the building owner must provide necessary funding

This guideline does not apply to art work such as murals, paintings, or other non-standard wall covering that is intended as decorative items. It also does not apply to wall finishes that are a part of a larger renovation or remodeling project.

Use the following to guide when the JCC will fund and what priority painting and wall/window covering request should receive.

**Priority 1:** Only when done as part of a larger Priority 1 FM that would require painting to complete the repair. Example; If a water leak resulted in replacement of sheetrock, painting to match the preexisting color would be included in the renovation effort.

**Priority 2:** Only used for significant safety hazards (e.g., peeling lead-based paint). Priority 2 facility modifications should be limited to the minimum effort needed to address the immediate concern (corner to corner painting versus whole room).

**Priority 3:** Use when excessive wear does not justify a Priority 2 but impacts the dignity of the court to a level that its correction will improve court operations and provide minimal maintenance standards. E.G.: Repainting and wall covering repairs in public common areas and courtrooms where the wear/damage indicates a total lack of concern for basic maintenance standards. This is often in the eye of the beholder but should not include work that covers *normal wear and tear*. Priority 3 projects should be limited to the minimum effort needed to address the immediate concern (corner to corner painting versus whole room). Priority 3 facility modifications should limit planned work in alignment with this requirement during project scope development.

**Priority 4:** Only used where painting is required for code compliance.

**Priority 5:** Most painting and wall/window covering replacement will fall into this priority. The JCC will develop a cyclical painting program that will set standards for desirable painting cycles. Due to the limited funding for this priority, courts should be encouraged to budget for recurring painting and wall covering replacement.

**Priority 6:** Only used to provide repairs/covering after the removal of manage but not abated hazardous materials.

## **Guideline 3**

### **Flooring**

The JCC has the responsibility for maintenance of flooring. Rule 10.810 allows the courts to use their operating funds for flooring, but does not require them to fund the maintenance to a JCC standard. Thus if the court is not willing or able to fund this to meet the JCC standard of finish and appearance the JCC as the building owner must provide necessary funding for flooring.

Use the following to guide when the JCC will fund and what priority flooring request should receive.

**Priority 1:** Only used when there is a complete collapse of the subflooring that results in damage to the floor finishing or when done as part of a larger Priority 1 FM that would require flooring repairs/replacement to complete the repair. Example; If a water leak resulted in molding carpeting, replacing the carpet to match the preexisting carpet would be included in the repair effort.

**Priority 2:** Only used for significant safety hazards, i.e. tripping hazards. Before flooring replacement is approved repairs of the existing flooring should be attempted. Only when repairs are not practical or cost efficient should total area flooring be replaced. Even then it should normally be limited to the room/area and not extended to the entire floor or department.

**Priority 3:** Use when excessive wear does not justify a Priority 2 but impacts the dignity of the court to a level that its correction will improve court operations and provide minimal maintenance standards. E.G.: Repairs in public common areas and courtrooms where the wear/damage indicates a total lack of concern for basic maintenance standards. This is often in the eye of the beholder but should not include work that covers *normal wear and tear or aging*. Priority 3 work should be limited to the minimum effort needed to address the immediate concern (single room versus whole floor).

**Priority 4:** Only used where flooring repairs/replacement is required for code compliance.

**Priority 5:** Most flooring replacement will fall into this priority. Due to the limited funding for this priority, courts should be encouraged to budget for normal life cycle flooring replacement.

**Priority 6:** Only used to provide repairs/replacement after the removal of manage but not abated hazardous materials.

## **Guideline 4**

### **Special Purpose HVAC**

Special Purpose HVAC is any system or portion of a system that is not necessary for people comfort but is needed to control the temperature or humidity for equipment or items being stored and/or backup units to supplement the building system for these types of requirements. Examples of this would be computer room HVAC units, HVAC systems for evidence storage rooms/units, built in or stand alone refrigerators, and other such systems.

The determination of what specialty HVAC equipment is part of the courts equipment and what is a part of the facility is often a very fine line. Refrigerators, freezers, and other such stand alone appliance used for court employees or even for evidence storage are clearly court equipment and the responsibility of the court. Responsibility for computer room HVAC whether a computer rack air conditioner (CRAC) or a whole room system is less clear. Due to the nature of this equipment and the fact that it is often tied to the building HVAC either through shared ducting, chilled water, etc; it is normally treated as part of the facility.

It is imperative on the courts that they consult with the JCC anytime the heat load is going to change for this type of equipment. Adding new computers, removal of computers and adding staff into a computer room will all have an impact on these standalone/back up units. Failure to plan with the JCC facility staff could result in delays in changes to the HVAC equipment and thus the ability to support the heat load.

Prioritization of work related to this type of equipment should follow the normal prioritization process and consideration.

## **Guideline 5**

### **Security Related Projects**

The determination of what specialty security projects is part of the court's equipment and what is a part of the facility as a whole is often a very fine line. Metal detectors, scanning equipment, and other such stand alone plugged in equipment used by court employees, sheriff or contractors are clearly court equipment and the responsibility of the court. Exterior security lighting, making accessible entry areas that can house security equipment, perimeter alarms, normal exterior locks and hardware, and holding cells are all clearly part of the facility and thus a JCC responsibility. Responsibility for cameras, interior locks, and other security related but attached equipment is less clear.

To determine funding responsibility the following criteria should be considered:

The JCC funds:

- permanent changes to the facility and accessibility;
- permanent changes to fixed counters and access areas;
- exterior security to include lighting, and alarms;
- repair and maintenance of "transferred" holding cells ;
- installation and maintenance of JCC recommended camera systems;
- all locks and hardware permanently install as part of the building; or
- all attached security equipment found in a typical office building.

The Courts fund

- all security related personnel cost and portable equipment;
- all furniture and removable locks;
- the replacement of all keys/cards lost by court personnel ;
- panic, duress, or similar emergency notification systems; or
- all security related equipment not found in the typical office building unless identified as not court allowable per Rule 10.810 (See Attachment 2).

It is imperative on the courts that they consult with the JCC anytime they are planning to add, change, or remove security equipment, or change security procedures that could have a facilities impact. Adding new equipment, removal of equipment, and changing the entry locations for either court staff or the public could all have an impact on the facility. Failure to plan with the JCC facility staff could result in delays in changes necessary to support the new security requirements.

Facility modification projects are limited in the replacement of failed equipment. Prioritization of work related to failed equipment should follow the normal prioritization process and consideration. Work shall be limited to like-for-like replacement as much as is technically possible.

Projects enhancing facility security systems shall be prioritized as a Priority 3 project.

All security related project must be coordinated with Emergency Response and Security (ERS). All justification and related scoring for these projects should be confirmed by ERS as being valid requirements and not outside the scope of normal JCC standards.

## **Guideline 6**

### **Hazardous Waste Management and Disposal**

Hazardous waste includes a wide range of materials and substances ranging from small disposable batteries to substances such as asbestos and polychlorinated biphenyl (PCB). Because of this wide range of materials a simple guideline is difficult to develop that will clearly cover every possible situations. For the purpose of this guideline, hazardous waste is divided into three groupings based on who uses or generates the waste. The three groups are court generated, janitorial related materials, and building materials. Management and disposal of generated waste must comply with all environmental regulations governing the packing, containment and disposal of hazardous waste regardless of who is responsible.

Court generated materials include all items that are not janitorial related or a part of the building construction or its equipment. Examples include toner cartridges, batteries, court owned equipment such as computer equipment containing heavy metals or equipment with refrigerant containing devices, and items stored in an evidence room.

Janitorial related materials include all cleaning material such as detergents and solvents, as well as, any waste generated as a result of cleaning such as greasy rags or waste water containing hazardous material. Management and disposal of janitorial materials and generated waste is the responsibility of the court through their janitorial service and must comply with all environmental regulations governing the packing, containment and disposal of hazardous waste.

Building generated hazardous material covers the vast majority of hazardous material in the facilities. It includes building construction materials like asbestos and lead based paints, and hazardous material contained in building equipment like PBCs and various fluids. All waste generated as a result of maintenance and repairs such as paints, oily rags, acid batteries, etc. fall in this category. The appropriate packing, containment, and disposal of all building generated hazardous material are the responsibility of the JCC and due to the cost of disposal is routinely a FM.

[NOTE: The one exception to this would be when a court-funded project impacts the hazardous material. For example, in a court funded renovation the court assumes all responsibility and cost for the protection of the building occupants and property, as well as, the cost associated with the proper packing, containment, and disposal of all materials removed during demolition and material left over at the end of the project.]

Some items are more difficult to clearly identify into one category or the other. One of these is human waste in its various forms to include blood and feces. While normally this type of waste is a janitorial issue, there are occasion when the quantity or location of the waste make it beyond the capability of a normal janitorial function. For example cleanup after a violent assault which leaves blood on the carpeting or walls or a major sewage line break that deposit large amounts of human waste into either the building or the grounds. Both examples shift responsibility for the containment and disposal of the hazardous waste from part the normal janitorial function to a larger facility management issue. This becomes a JCC responsibility and likely will be part of the larger FM needed to restore the facility to it normal functionality.

Prioritization of work related to these types of efforts should follow the normal prioritization process and consideration. In many cases the disposal of hazardous waste is not the sole purpose of the effort and is simply an additional task related to a larger project.

## **Guideline 7**

### **Patron Seating**

Patron seating is considered any seating that is not normal court employee seating and is not seating around a table. This includes all public seating in court rooms, public hallway, waiting areas, jury assembly rooms, and other public access areas.

This seating is normally multi-person seating such as benches, pews, and other gang seating, and individual seating that is by design attached to the facility such as chairs that are bolted to the floor. The exception to this is couches and similar types of multi-person seating that is normally seen as standalone furniture and not normally bolted in place.

Court Employee seating, seating around a table, and couches are considered as furniture. Furniture is a court funding responsibility.

As an example in the courtroom, the audience seating and jury seating would be a JCC responsibility while the court employee seating and the litigate seating would be a court responsibility. All seating in the jury assembly area, except for employee seating and couch type seating, would be a JCC responsibility. Chairs in a jury deliberation room would be furniture and thus a court responsibility.

Prioritization of work related to fixture seating should follow the normal prioritization process and consideration.

## **Guideline 8**

### **Installation and Support for Court Owned Equipment/Furniture Guidelines**

Court owned equipment and furniture cover a very broad range of items ranging from small white boards up to large computer racks, and includes all furniture items that are not built into the building. For the purpose of this guideline these items are broken into three categories; furniture, equipment, and electronic equipment to include all computers, communications, and audio/visual equipment.

Furniture is normally a court funding responsibility. The exceptions are when the furniture is built into the building and not simply attached. A good example of this is the judge's bench and public service counter. This applies even if these benches and counters are made of modular furniture construction. Built-in bookcases and service counters are other good example of items that the JCC will maintain.

Equipment includes all items that are not building systems. They could be stand-alone, attached or built-in. This covers a wide range of items including but not limited to items such as white boards, clocks, file storage systems, portable/movable electronic equipment, court owned appliances, electronic calendars, and display boards. The cost of this equipment and the cost to move, mount, or install this equipment is the sole responsibility of the court. If additional 110/220v standard electrical outlets that could be used for other purposes are needed to support portable equipment, the outlet will be installed at the JCC cost.

The installation or removal of built in equipment must be coordinated with the JCC. Installation and removal of such items often result in damage or changes to the facility. For example, the installation of built-in electronic calendars requires the cutting into wall finishes, and the additional electrical load. Removing them will require the wall finishes being repair. The JCC can provide these service at the court's expense or the court can contract the services themselves but must have the plans/designs approved by the JCC in advance.

Communications and audio/visual equipment is the responsibility of the court. The JCC's only cost related to this type of equipment would be to provide adequate power as needed. This could be as simple as adding an outlet or bringing a whole new electrical panel in for a new set of communication routing switches. During equipment failures the JCC will check and confirm that adequate power is going to the equipment, any additional support will be at the court's expense.

Prioritization of work related to equipment should follow the normal prioritization process and consideration.

## **Guideline 9**

### **Art, Interior Decorations, and Special Purpose Decorations**

Artwork can take many forms. Some art is purely decorative in nature such as paintings; other artwork is both decorative and functional such as seating walls, planting areas, and decorative flooring and wall covering. This guideline applies to both types of artwork.

Artwork, interior decorations and special purpose decorations are the responsibility of the court and not the JCC. Any of these types of items that were transferred to the JCC as part of the SB 1732 transfer process become the property of the JCC unless ownership is assumed by the court. If the court does not take ownership of the property the JCC at its discretion can remove, change, or maintain the artwork or decorations.

The court is responsible for those items simply hung on the walls or sitting in the facility. This would include most framed paintings, plants not part of a built-in atrium or similar structure, movable or temporary displays, temporary decorations such as holiday decorations and community displays. These items are considered the property of the court or employees working in the facility.

Some facilities have artwork on loan or maintained by local organizations such as historical societies or the artist. Both the JCC and the court must work closely with such organizations or owners to ensure artwork is properly maintained. If the owner or responsible organization request assistance in the maintenance and/or movement of the artwork the JCC will provide support in accordance with any established agreements with the artist or local organization. In the event no established agreement exists, the JCC will at its discretion may assist or determine that the requested assistance is not in the interest of the JCC and thus decline to provide the support without reimbursement of cost.

## **Guideline 10**

### **Facility Modifications in Facilities To be Replaced With Funded Capital Projects**

The use of Facility Modification funds in facilities with funded Capital Project that will result in the courts vacating the existing facility need to be carefully scrutinized. Since the time from funding of a Capital Project to move in is often five or more years, it is unreasonable to say that no FM funding will be permitted. The challenge is to fund those FMs that are critical to continue the operations of the facility and prevent excessive deterioration but are cost proportionate to the amount of time the court will remain in the facility. The following guidelines should be used in making funding decisions:

1. FM's that are critical to continue the normal operations of the facility should be funded.
2. Fire, life, safety and security issues normally will be funded.
3. When the cost of maintenance or operations due to failing systems is determined to exceed the cost of repair work to fix said failed system. For example: the impact to operations and cost of deterioration to the facility due to leaks may justify the replacement of a roof even though the roof will last for 20 years when the Courts are scheduled to leave after 5 years.
4. The JCC will take the limited life for the facility into consideration when determining the necessary FM actions needed.

FMs to enhance court operations, improve the appearance of the facility, and other items not required to maintain the existing operations must be evaluated on a cost versus years of service remaining. Items having short life cycles such as painting may be justified if the facility still has three or more years of court usage. Some items are required to maintain the dignity of the court. Generally, the following formula should be used as a guide to determine the amount to be spent on the above type items.

- Number of years of remaining usage *multiplied by* the square foot of court space *divided by* 10 *equal's* amount to be spent in any fiscal year.
- Using this formula a facility with five years of remaining court usage with 50,000 square feet could have approximately \$25,000 of FMs to enhance court operations and improve the appearance of the facility. While a similar sized facility with only two years of usage would have \$10,000.
- All requests beyond the scope of the formula will be highlighted to the Advisory Committee.

Courts may at their discretion fund additional enhancements or improvements to the facility, but JCC and court funding should not be combined for a single project.

Additionally FM funds will not be used to supplement or reimburse costs relating to a Capital Project: this includes contributing FM funds to a Capital Project, reimbursing the JCC for cost overruns or Court for work performed as part of a Capital Project. This fund exclusion does not extend to work after the completion of a Capital Project to enhance operations, improve the maintainability of the facility, or maintain the facility after expiration of warranties. In Capital Projects that occur in an existing facility, this exclusion does not pertain to repair or maintenance of items outside the scope of the Capital Project.

## **Guideline 11**

### **Funding of Facility Modifications in Court-Funded Leased Facilities**

This guideline applies to all leases managed by the JCC but funded by the courts. This could include leases for new judgeships, storage, or for any of a number of court-supported programs for which the local court pays the lease costs.

Most court-funded leases are like the majority of leases managed by the JCC, in that the lessee provides the majority of the facility maintenance needs. This routinely includes many items that would be facility modifications if done in a JCC owned facility. Normally these costs are included in the lease and no additional funding is required.

In some cases, there may be items that are not included in the lease cost that may fall into the category of facility modification. The TCFMAC will consider funding such items using the same prioritization and scoring methodology as with any facility modification. If funded the JCC will work with the lessee to determine how the work will be performed.

Facility modification funding will not be used for any of the following. See Guideline 15 for details regarding Court-Funded Facility Requests.

- To increase leased space.
- To change the basic function of the space, e.g. turn a warehouse into an office space.
- To pay for work that is the responsibility of the lessee.
- To pay for any cost that is amortized over the course of the lease or is a part of the operational expenses paid on a recurring basis.
- To pay for initial Tennant Improvements. Facility modification funding will only be considered after the court has occupied the space for six months or more.
- To pay for any cost related to storage space.

## **Guideline 12**

### **Americans with Disabilities Act (ADA) Projects**

The JCC has the responsibility to make all of their buildings comply with the Americans with Disabilities Act (ADA) most current regulations.

This is not an ADA guideline, but a guideline for projects that have ADA upgrades as the primary scope of work, the priority's focus must be specific to these upgrades.

This guideline does not apply to buildings constructed after the year 2000 as these buildings were constructed to the latest ADA guidelines and any modifications to these structures should have ADA compliance as a standard and not an upgrade in this construction.

Use the following to guide when the JCC will fund and what priority ADA upgrades should receive.

**Priority 1:** ADA projects will not fall under this priority as this priority is for projects that are immediately or potentially critical in nature. Such conditions may include, but are not limited to, the following; major flooding; substantial damage to roofs or other structural building components; or hazardous material exposure.

**Priority 2:** Only used to mitigate a legal action or written complaint and only for the items noted in the action or complaint. Example; if the complaint or legal action identifies no ADA accessible bathrooms on the first floor, the focus will be on providing an accessible bathroom on the first floor and not throughout the building. If ADA compliance is part of the overall repair, then compliance must be followed for that specific repair. Example; if the priority 2 is to replace a washroom lavatory and fixtures, that particular lavatory and associated fixture and its components must be ADA compliant.

**Priority 3:** Use when there is an impact to the dignity of the court to a level that it's correction will improve functionality, usability and accessibility of court operations. Priority 3 work should be limited to the minimum effort needed to address the immediate concern. If ADA compliance is part of the overall repair, then compliance must be followed for that specific repair. Example; if the priority 3 is to replace or add a break room cabinet, sink and fixtures, that particular cabinet and associated fixtures, and its components must be ADA compliant.

**Priority 4:** Most ADA work will fall under this priority. Example; Doors do not have closers or proper pull weight, bathrooms are not compliant, ramps needed, service counter heights to high and Elevator operating panels not compliant.

**Priority 5:** ADA projects will not fall under this priority.

**Priority 6:** ADA projects will not fall under this priority.

## **Guideline 13**

### **Using Cost to Assist in Facility Modification Determinations**

This guideline applies to work performed by the JCC that is funded from either the facility modification or operations and maintenance (O&M) funds. The Facility Modification Policy, approved by the Judicial Council on July 27, 2012, provides a definition of a facility modification. The definition acknowledges the difficulty in distinguishing a facility modification from routine maintenance. This Guideline is intended to supplement and aid in making that distinction not change the definition itself. This guideline will only be used after all other criteria in the definition have been used and a determination cannot be made as to whether or not the project is a facility modification.

The definition asks several questions related to making the distinction between a facility modification and O&M. One question relates to the amount of time and materials needed to complete the work. The amount of time and material could be considered to be the cost of the effort. Thus, cost could be one of the factors used to determine the distinction when other specific criteria listed in the Policy do not provide a clear distinction. Based on this, Service Work Orders with an estimate of over \$2,000 are generally considered to be facility modifications, while those under \$2,000 are generally considered to be O&M.

Projects should not be scoped with this guideline in mind. The levels of effort should be based on the need to deliver a complete and usable end product not be scoped to be a specific dollar amount. Breaking larger projects into smaller pieces to avoid them being over \$2,000, or combining unrelated items to ensure the estimate is over \$2,000 is not permitted.

## **Guideline 14**

### **Vandalism & Graffiti Mitigation**

It is the responsibility of the JCC to address vandalism. Vandalism includes graffiti related damage. Projects where a facility or its components are damaged, seriously deteriorated, dysfunctional, subject to intermittent service outage, or are otherwise in insufficient operating condition due to vandalism should be treated as facility modifications and processed through the standard facility modification process. Minor graffiti related vandalism projects will be treated as routine maintenance work. Standard processes and authorities should be used for planning, approval and execution.

Graffiti/Vandalism projects that qualify as Facility Modifications, as defined above, should use the following guide to determine what priority ranking the Graffiti/Vandalism should receive.

**Priority 1:** Vandalism Mitigation projects may fall under this priority. These projects immediately impact and/or are potentially critical in nature. Such conditions may include, but are not limited to, the following; major flooding; substantial damage to roofs or other structural building components; or hazardous material exposure. It would be exceedingly rare for a graffiti related vandalism project to reach this level of impact to court operations.

**Priority 2:** Graffiti/Vandalism Mitigation can only be justified as a Priority 2 if it is described as vandalism, in a public area that must be repaired immediately to prevent further deterioration of the building infrastructure. Public areas are generally described as building lobby areas, restrooms within free access areas, and corridors outside of courtrooms where the public congregate. Priority 2 facility modifications should be limited to the minimum effort needed to address the immediate concern.

**Priority 3:** Use when there is an impact to the dignity of the court to a level that its correction will improve functionality, usability, and accessibility of court operations. Priority 3 work should be limited to the minimum effort needed to address the immediate concern.

**Priority 4:** Only used where Graffiti/Vandalism Mitigation is required for code compliance.

**Priority 5:** Graffiti/Vandalism Mitigation projects will not fall under this priority.

**Priority 6:** Graffiti/Vandalism Mitigation projects will not fall under this priority.

#### **Classifications of Graffiti/Vandalism Mitigation:**

##### **Examples of Minor Graffiti/Vandalism using Operations and Maintenance Funding:**

- Vandalism – Graffiti Removal – Fill, sand, and paint bathroom two (2) partitions and/or urinal screens. Graffiti has been etched in the metal partitions and urinal screen in the men’s public restroom.
- Vandalism – Graffiti Removal – Sand and refinish the public corridor side of one (1) door that was vandalized with graffiti.

- Vandalism – Graffiti Removal – Sand, stain, and refinish two public benches (Bench top’s only) which were vandalized by graffiti outside the courtrooms, this work will need to be completed after hours.
- Vandalism – Graffiti Removal – Remove and replace the anti-graffiti film on three mirrors in the men’s public rest room in the lobby.
- Vandalism – Graffiti Removal – Seal and paint one wall (approximately 80sf) to cover the graffiti in the women’s public restroom.

**Examples of major Vandalism using Facility Modification Funding:**

- FM Priority Rating - 2 Vandalism - Apply 1/8 inch Petra-coat finish to the 1st and 2nd floor Men's public restrooms and replace two damaged mirrors with four new ones as well as one damaged paper towel dispenser. Currently Court visitors are scribing into the drywall above the tile on the walls in the 1st and 2nd floor men's public restrooms. Much of the vandalism is gang related.
- FM Priority Rating - 2 Vandalism – Sand, stain, and refinish 20 public benches which were vandalized by graffiti outside the courtrooms, this work will need to be completed after hours.
- FM Priority Rating - 2 Vandalism - Grind out and buff etched in graffiti at the stainless steel inner elevator doors. After removal, furnish and install anti-graffiti film on doors and side panels.
- FM Priority Rating - 3 Vandalism – Holding Cells Benches - Renovate 88 LF of vandalized benches in four (4) holding cells. Metal cladding will be placed over approximately 88 LF of wooden benches that have been vandalized by in-custodies.

## **Guideline 15**

### **Court-Funded Facilities Requests (CFRs)**

The Judicial Council has delegated to the Trial Court Facility Modification Advisory Committee the authority to approve new Court-Funded Facilities Requests (CFRs) if all of the following are true:

1. The court contribution will be used exclusively to pay for the following urgent court facilities needs:
  - i. Lease-related costs (i.e., lease payments and operating costs, repairs, or modifications required by a lease);
  - ii. Costs that are allowable court operations expenditures under rule 10.810 of the California Rules of Court (i.e., equipment, furnishings, interior painting, flooring replacement or repair, furniture repair, or records storage), if the court prefers to have the JCC handle the matter on its behalf;<sup>1</sup> or
  - iii. Other facility improvements that are not allowable court operations expenditures under rule 10.810 (i.e., facilities operations, maintenance, repairs, and modifications but not capital projects), if they would improve a court's functioning or reduce ongoing court operating costs.
2. If the court financial contribution will pay lease-related costs:
  - i. The JCC holds or has accepted assignment of the lease;
  - ii. The lease term will not exceed five years; and
  - iii. Any lease renewal (including renewals pursuant to an option contained in an existing lease contract) must be considered as a new CFR.
3. Courts wishing to contribute funding for multiple small projects that are non-lease items in a fiscal year may expedite the approval process by submitting a single CFR, under the following procedure:
  - i. The CFR proposes a maximum fiscal year budget (i.e., the court's cumulative total financial contribution) for small projects that year;
  - ii. Following approval of that amount, the court will submit individual service work order requests, to be charged against its authorized maximum annual fiscal year budget as follows:
    - a. Individual service work orders may not exceed \$15,000.
    - b. Each service work order will identify the type of service requested, and state whether the work is rule 10.810 allowable or unallowable.
    - c. If the work is rule 10.810 allowable, the service work order will provide a brief explanation of the reason that the court prefers to have the JCC handle the matter on its behalf.
    - d. If the work is not allowable under rule 10.810, the service work order will provide a brief explanation of how the requested work will improve the court's functioning or reduce ongoing court operating costs.

---

<sup>1</sup> Courts retain the option of making rule 10.810 allowable expenditures on their own, without resorting to the new CFR Procedure or an allocation reduction.

- e. Once a maximum fiscal year budget for small projects has been approved, a regional manager for the JCC's Facilities Management Unit may approve individual service work order requests.
  - f. The JCC's Facilities Management Unit must report at each meeting of the Trial Court Facility Modification Advisory Committee on disposition of all individual service work order requests received since the committee's last meeting.
- iii. A court's cumulative financial contribution via service work orders may not exceed the maximum fiscal year budget established under the original CFR. Work requiring expenditures beyond that established budget will require a new CFR.
4. The court's presiding judge or court executive officer submits a CFR application demonstrating the court's ability to meet the financial commitment.
  5. The JCC's Fiscal Services Office (FSO) will review the court's application and any other relevant information, may request further information from the court as needed, and will advise if it has concerns about the court's ability to meet the proposed financial commitment.
  6. If there are no unresolved FSO concerns, the court will execute an intra-branch agreement (IBA) with the JCC, authorizing the JCC to directly pay the costs covered by the court's CFR from the Trial Court Trust Fund (TCTF), making a corresponding reduction to the court's TCTF allocation.
  7. Any court submitting a CFR application must agree that its TCTF allocation will be reduced, during the period specified in the application, if approved, to meet the full financial commitment, notwithstanding any other court financial needs that may arise, as other court facilities funding sources are fully committed and therefore not available to replace a court contribution.
  8. If the JCC's FSO has concerns about a court's ability to meet a proposed financial commitment, it may present those concerns to the Trial Court Facility Modification Advisory Committee, and the court may present a response.

The Trial Court Facility Modification Advisory Committee will provide, on a quarterly basis, an informational report to the Judicial Council about all CFRs granted during the previous quarter, with reports to specify the nature of the cost covered by each court's contribution, the reason each request was considered urgent, and key terms for any leases (e.g., start and end date of term, options to renew, early termination provisions, total cost, and covered improvements).

## **Guideline 16**

### **Charging Stations For Electric Vehicles**

As use of electric-powered passenger vehicles increases in California, requests have been made by various Judges and Commissioners for installation of charging stations or the use of existing outlets for the charging of personally owned vehicles. This raises at least two questions: (1) should judicial officers, court employees or other court users be allowed to use existing outlets to charge their personal vehicles, and (2) should the judicial branch install formal electric car charging stations, which might be operated on a pay-per-use basis.

*Use Of Existing Outlets.* In general, the use of public resources by public employees in the workplace for personal benefit is not acceptable pursuant to California Government Code section 8134. Therefore, while de minimis use of electricity by employees may be legitimate in emergency or other special circumstances, court employees should not take advantage of the court's electric power to charge personal vehicles on a regular basis. The Trial Court Facilities Modifications Advisory Committee and the JCC personnel responsible on a regional basis for courthouse maintenance are not in a position to monitor the use of existing outlets by judicial officers, court employees and other courthouse users for abuse of public resources. Therefore, responsibility for the proper use of public resources (e.g. electric power) must remain primarily with local court managers and responsible judicial leaders on site.

*Addition Of New Charging Stations As Facility Modification.* While it would be wonderful if the judicial branch could afford to add electric charging stations to existing courthouses or to new courthouses, this is not a service which is in any way central to the mission of the courts. Since there is a continuing shortfall in resources needed to keep existing courthouses in habitable, usable condition for public service, the installation of new electric charging stations is a capital improvement which falls below Priority 6 (the lowest Priority on the existing scale). For this reason, a new category of Priority 7<sup>2</sup> has been created for the category "Desirable For Reasons Not Related To Court Operations." This will distinguish this kind of improvement from Priority 3, which includes improvements to existing courthouses which "improve the functionality, usability, and accessibility of a court facility" and which "will improve court operations."

*Local Option To Arrange For Charging Stations.* Since there are many different ways in which new electric charging stations can be installed (e.g. Blinknetwork.com, Plugshare.com, Chargepoint.com), the judicial branch will allow local courts to experiment with the installation of charging stations if suitable locations are available. As a policy matter, the Trial Court Facilities Modifications Advisory Committee strongly recommends against installations which will serve only secured parking areas for judicial officers. Any such new facilities should be available to at least court employees generally, not just for judicial officers.

The local court or an outside provider needs to invest the capital needed to make a code-compliant installation which does not overload existing circuits, switches and transformers. All such work must be approved in advance by the responsible JCC regional facilities manager, even

---

<sup>2</sup> The Facility Modification Policy as currently approved by the Judicial Council does not provide this priority. Until such time as this priority is formally adopted by the Council, the work meeting this definition shall be categorized as Priority 5 work.

for courthouses which are locally managed through the delegation pilot program. All such requests must be submitted for pre-approval to the TCFMAC as a Court-Funded Request; see also Guideline 8 “Installation and Support for Court Owned Equipment/Furniture Guidelines” for additional provisions applicable to such improvements.

Users should pay some fee consistent with comparable public charging stations and the cost of electricity consumed, and the provider must make arrangements in writing with JCC facilities management to reimburse the judicial branch for the power used unless it is supplied via a separate meter charged directly to the provider.

These rules do not apply to county managed courthouses and parking lots because responsibility for these issues is with the relevant county.

## **Guideline 17**

### **Building and Security Systems Funding Responsibility**

The Judicial Council (JCC) has the responsibility for the system infrastructure replacement and renewal. JCC funding generally carries legislated restrictions and therefore may only be used for specific functions and within specific circumstances. Rule 10.810 (See Attachment 2) allows the courts to use their operating funds for painting, wall/window coverings, carpet, and security. But it does not require them to fund this work.

All work whether a renewal, renovation, replacement or repair is subject to budget availability regardless of the fund source. The table below identifies three potential fund sources which would bear primary responsibility for work associated with specific components and systems should available budgets allow for it.

Available funding will lag behind demand and therefore work funded by the Real Estate and Facilities Management office must be prioritized in alignment with the FM Policy. Work funded by the Office of Security will be required to comply with the strictures of their funding rules.

The following tables A and B intend to provide definition on primary funding ownership for many different building systems, components and equipment. While not a complete and exhaustive list, it is generally comprehensive and deals with the majority of systems, components, and equipment common to court facilities.

Table A deals with building systems and components in general. It should be used as a guideline to identify responsibility of specific components and systems found within the building.

Table B deals with building security systems exclusively. It should be used as guideline to identify primary responsibility for the various security components that support the security function within the court.

Ownership of systems can be, and many times is, also the responsibility of the county. Engaging the county in the maintenance and renovation of their owned systems falls to the party identified as having primary funding responsibility. For example in a facility where the JCC has partial equity and the county serves as the managing party the JCC is responsible for working with the county to ensure that the HVAC system is properly maintained and, when appropriate, renovated.

### Executive Summary

This informational report to the Judicial Council outlines (1) allocations of facility modification (FM) funding made to improve trial court facilities in the fourth quarter (April through June) of fiscal year 2019–20, and (2) a summary of all funding allocations during the fiscal year. To determine allocations, the Trial Court Facility Modification Advisory Committee (TCFMAC) reviews and approves FM requests from across the state in accordance with the council’s *Trial Court Facility Modifications Policy*.

### Relevant Previous Council Action

This report is submitted quarterly as required by the Judicial Council’s *Trial Court Facility Modifications Policy* (see Link A).<sup>1</sup> Most recently, on July 24, 2020, the council received the quarterly report for the third quarter of fiscal year (FY) 2019–20 (see Link B). On November 14, 2019, the council received the *Annual Summary of Facility Modifications for Fiscal Year 2018–19* (see Link C).

---

<sup>1</sup> Per this policy, each quarterly report includes a list of all facility modifications funded during the quarter as well as any reallocation of funds between the funding categories (i.e., facility modification priority categories 1–6).

## **Analysis/Rationale**

Funding decisions were based on the prioritization and ranking methodologies of the *Trial Court Facility Modifications Policy*. There are six priority categories of facility modifications: Priority 1, Immediately or Potentially Critical; Priority 2, Necessary, but Not Yet Critical; Priority 3, Needed; Priority 4, Does Not Meet Current Codes or Standards; Priority 5, Beyond Rated Life, but Serviceable; and Priority 6, Hazardous Materials, Managed but Not Abated. The current level of funding allows the TCFMAC to address only the most critically needed Priorities 1 and 2 and some Priority 3 facility modifications statewide.

FM requests are also reviewed and approved in accordance with the Judicial Council's *Court-Funded Facilities Request Policy* (see Link D). This policy presents the procedures and requirements to allow trial courts to make court-funded facilities requests (CFRs). Trial courts may assist with the funding of certain facilities costs (i.e., facility modifications and lease-related costs) by contributing funds toward urgent facilities costs—not including capital-outlay expenses—through allocation reductions from the Trial Court Trust Fund.

Allowable facilities costs that a trial court can fund through a CFR include (1) facility modifications as defined in the *Trial Court Facility Modifications Policy*; (2) court operations costs allowable under rule 10.810 of the California Rules of Court, such as equipment, furnishings, interior painting, flooring replacement or repair, furniture repair, and records storage; and (3) lease-related costs, such as lease payments and operating costs, repairs, and modifications authorized by a lease. CFRs are approved by Judicial Council staff, with the following exceptions, which require TCFMAC review and approval: ongoing operational cost increases to the Judicial Council beyond the initial outlay for the project (e.g., additional utility or maintenance costs); staff concerns about whether the CFR meets the policy's criteria or whether the proposed budget is accurate; and appeals of staff determinations.

## **Fiscal Impact and Policy Implications**

### **Fourth Quarter FY 2019–20**

During the fourth quarter of FY 2019–20, the TCFMAC reviewed and approved 340 facility modifications for a total estimated cost of \$11.5 million (see Attachment A). Of these, 190 were Priority 1 facility modifications and 150 were Priority 2 facility modifications. The Judicial Council's Facility Modification Program's share of the estimated cost was \$9.8 million, with the affected counties responsible for the balance. Most of these facility modifications involved elevator, roofing, plumbing, heating, ventilation, and air conditioning repairs or replacements.

In addition, council staff approved and the TCFMAC reviewed 22 CFRs in the fourth quarter of FY 2019–20 (see Attachment B).

### **Completed project spotlights**

Examples of FM projects completed during the fourth quarter of FY 2019–20 are shown below:

***Priority 2: Landscaping and Irrigation, Clara Shortridge Foltz Criminal Justice Center, Los Angeles County***

- Replacement of failed and inoperable irrigation system and existing plants with low-maintenance varieties suited to the Foltz Courthouse. The final project cost is \$401,102.

***Before***

***After***

***Priority 2: HVAC Replacement, Fourth District – Court of Appeals, Riverside County***

- Replacement of two (2) 75-ton rooftop HVAC package units. Existing units were 19 years old, were only expected to perform for 15 years, and failed whenever the roof temperatures reached over 114 degrees. Additional work included removal of existing curbs and sheet metal caps and the fabrication of new spring rails compliant with new structural codes. The final project cost is \$519,841.

***Before***

***After***

## Annual Summary

In FY 2019–20, the FM Program budget was authorized for \$65 million. TCFMAC priorities included the following (see Link A for definitions of these FM priorities):

- \$37.4 million was the Judicial Council’s share for 1,243 Priority 1, 2, and 3 FM projects (see Attachments C and D). These projects were funded as follows:
  - \$17.3 million was spent on 592 Priority 1 projects,
  - \$19.5 million was spent on 650 planned and unplanned Priority 2 projects, and
  - \$594,728 was spent on 1 Priority 3 energy-efficiency project;
- \$10.7 million was for secondary project phases and cost increases;
- \$2.4 million was to support statewide FM planning (i.e., project management functions and preliminary project planning and estimating); and
- Approximately \$1.6 million was to cover the judicial branch’s share of costs for county-managed emergency projects.

In FY 2019–20, a total of 1,255 Priority 1, 2, and 3 facility modifications were completed, and a total of 215 were cancelled (see Attachment D).

Work will be coordinated with cogen plant and ISD due to back feed to the cogen plant.	\$ 9,350	\$ 9,094	97.26
242	FM-0142851	Los Angeles	Pasadena Courthouse	19-J1	2	Holding Cell - Replace damaged ceiling, lights, and inspect non-operational cell door motor. Damage caused by previous leaking rooftop air handler #10 and #11-unit drain pans. Holding cell closed until multiple cell interior materials are replaced and cleared for re-occupancy.	\$ 21,074	\$ 14,615	69.35
243	FM-0142855	Los Angeles	Norwalk Courthouse	19-AK1	2	Plumbing - Refurbish hot water pump #1, replacing 1-set of bearings, gaskets, seals, machining and balancing impeller, sand blasting and painting. Pump is leaking and affects ability to provide hot water, affecting heat to floors 1-4.	\$ 10,637	\$ 9,045	85.03
244	FM-0142858	Los Angeles	San Fernando Courthouse	19-AC1	2	HVAC - Replace (2) floats for both cooling towers for the building. Floats have reached the maximum adjustment point making the float unable to be adjusted which causes the towers to overfill and overflow.	\$ 3,905	\$ 3,257	83.41
245	FM-0142867	Solano	Hall of Justice	48-A1	2	Fire Protection - Replace three (3) failed signaling modules on fire alarm system. Modules failure required fire watch to be performed until replacement completed.	\$ 6,072	\$ 4,422	72.82
246	FM-0142871	Los Angeles	Airport Courthouse	19-AU1	2	HVAC - Replace 1- 20 HP motor, bushings, and pulley in Air Handler Unit #4. The motor for the unit seized due to over usage which created very high temperatures in the basement.	\$ 5,570	\$ 4,298	77.17
247	FM-0142873	San Bernardino	Central Courthouse	36-A1	2	Elevators, escalators, & hoists - Replace rope grippers and adjust the bottom floor lock for public elevator #2. Elevator is faulting out, due to worn rope grippers and bottom floor door is getting stuck.	\$ 5,249	\$ 5,020	95.64
248	FM-0142877	Los Angeles	Whittier Courthouse	19-AO1	2	HVAC - Replace 1-ignitor assembly and 1-UV scanner for HVAC boiler # 2. Boiler is currently not functional due to rusted ignitor assembly and during start up, particles have scratched the UV sensor. Discovered during Preventive Maintenance.	\$ 3,043	\$ 2,630	86.43
249	FM-0142878	San Bernardino	San Bernardino Justice Center	36-R1	2	Holding Cell - Replace 1-tee rocker assembly, 1-switch, and re-weld 5-release rockers that failed. Holding cell doors cannot operate manually for emergency egress.	\$ 10,472	\$ 10,472	100.00
250	FM-0142879	Los Angeles	Airport Courthouse	19-AU1	2	HVAC - Replace (2) flanges and (2) hot water check valves (1 each on boiler pump #1 & #2) that are leaking caused by failed seals in gaskets. The leaking components causing loss of chemical treatment could reduce the life span of the equipment and affect ability to control the temperature to the courthouse.	\$ 7,746	\$ 5,978	77.17
251	FM-0142890	San Diego	North County Regional Center - North	37-F2	2	COUNTY MANAGED - Plumbing - Remove and replace defective PIV and one leaking fire hydrant. Post indicator valve replacement required for completion of fire sprinkler, Post indicator valve sign and water gong replacement.	\$ 10,960	\$ 10,960	100.00
252	FM-0142896	Los Angeles	Metropolitan Courthouse	19-T1	2	HVAC - Replace (1) flange bearing, and replace obsolete drive fan pulley to match motor drive sheave. Align and install new belts due to accelerated wear that caused them to get damaged due to uneven spacing between the pulley & sheave. Noise complaint from Air Handling Unit #7 is caused from the fan shaft spinning freely in a worn flange bearing.	\$ 14,570	\$ 13,774	94.54

Replace deteriorated sentry arm insulated safety padding. Multiple incident reports have been documented that the arm has closed onto a vehicle. Need to replace and install new safety loops in the asphalt, replace and install (1) new DKS control board, (1) new loop wire run and new wire sealant, replace (8) M/E insulated safety padding to sentry arm edges.	\$ 7,281	\$ 6,592	90.54
310	FM-0143108	Sutter	Sutter County Superior Courthouse	51-C1	2	Fire Protection - Replace audio control unit. Found that the ASU unit (part of the fire alarm panel) has an internal fault and needs to be replaced.	\$ 4,384	\$ 4,384	100.00
311	FM-0143109	Stanislaus	Hall of Records	50-A2	2	HVAC - Replace failed building hot water pump - seal has failed (more cost effective to replace pump than disassemble and attempt repack of seal).	\$ 4,492	\$ 3,496	77.82
312	FM-0143110	Santa Cruz	Jury Assembly Room	44-A3	2	Exterior Shell - Correct failed Entrance doors (2) - Replace (2) failed pivot sets and (2) Door closers; adjust/align for proper operation.- Doors will not close correctly and do not secure when used to exit.	\$ 3,099	\$ 3,099	100.00
313	FM-0143113	Stanislaus	Hall of Records	50-A2	2	HVAC - Replace failed motor contactor(switch) for Control Air Compressor - motor contactor phase 2 has failed causing trip of attached compressor motor.	\$ 2,292	\$ 1,784	77.82
314	FM-0143116	Mono	Mammoth Lakes Courthouse	26-B2	2	Exterior Shell - Repair the automatic front-entry sliding doors - Door malfunction is preventing door from operating properly.	\$ 3,601	\$ 3,601	100.00
315	FM-0143117	Merced	Robert M. Falasco Justice Center	24-G1	2	HVAC - Repair refrigerant leak on AHU evaporator coil, recharge lost refrigerant - Manufacturer was contacted and unit was found to be in Warranty. Manufacturer is providing a new coil only, in warranty. One year labor warranty (not covered).	\$ 5,125	\$ 5,125	100.00
316	FM-0143118	Merced	Main Merced Courthouse	24-A8	2	HVAC - Replace failed compressor number 3 (of 4) on AHU-01 - Unit failed due to valves in head assembly (out of warranty)	\$ 18,250	\$ 18,250	100.00
317	FM-0143120	Los Angeles	Van Nuys Courthouse West	19-AX2	2	Interior Finishes - Replace missing door and damaged door frame on roof. Missing door is allowing birds to fly into the cooling tower roof access. An excessive amount of birds are nesting in the surrounding area causing an excess amount of bird feces and occasional dead birds. Install (1) 3ft x 7ft door frame and (1) 3ft x 7ft hollow metal door, (3) hinges, (1) mortise lock assembly, and (1) surface mounted door closer for penthouse roof stairwell.	\$ 4,359	\$ 3,508	80.48
318	FM-0143123	Los Angeles	Inglewood Juvenile Court	19-E1	2	Exterior Shell - Replace unsecured and deteriorating metal letters mounted on the building fascia in front of the courthouse utilizing a 30 ft boom lift. The "E" and "D" in Inglewood and the "T" in County. The letters are of metal construction, facing the main walkway leading into the courthouse, and if not secured can potentially injure public/staff.	\$ 3,656	\$ 2,953	80.78
319	FM-0143136	Los Angeles	Pasadena Courthouse	19-J1	2	Elevators, escalators, & hoists - Replace 1-cylinder for second safety brake circuit on public elevator #3. Leaking cylinder failed causing an electrical switch to fail.	\$ 4,630	\$ 3,211	69.35
320	FM-0143140	Los Angeles	Bellflower Courthouse	19-AL1	2	Vandalism - Replace 2-27" x 22" metal covers for sump pumps on the grounds. The existing covers were vandalized and damaged requiring replacement.	\$ 4,203	\$ 3,276	77.94
321	FM-0143141	Los Angeles	Bellflower Courthouse	19-AL1	2	HVAC - Replace 1-2 ton condenser unit and 1-air handler unit for 1st floor main computer room for the entire building. Existing condenser has multiple leaks, causing high temperatures in the computer room, which could cause damage to communications and computer systems. It will be necessary to disable the Halon system while work is being done and then enable the Halon system subsequent to completion of work.	\$ 11,235	\$ 8,757	77.94
322	FM-0143143	Riverside	Southwest Justice Center	33-M1	2	Elevators, Escalators, & Hoists - Elevators 6 & 7 - Remove and replace failed/damaged door sensor lens/units and the electronic detector edges of in-custody elevators 6 and 7. Failure to replace the sensors and door edges will result in additional cab failures and entrapments. Work to be completed after-hours due to the sensitive location (holding).	\$ 8,038	\$ 8,038	100.00
323	FM-0143156	Los Angeles	Stanley Mosk Courthouse	19-K1	2	Vandalism - Replace (4) mirrors (1- 26x124, 1- 26x72, 1-18x36, & 1- 16x25) and add anti-graffiti film in the 4th floor Men's public restroom due to gang graffiti etched into mirrors.	\$ 2,214	\$ 2,153	97.26

14	36-CFR067	San Bernardino	36-J1	Barstow Courthouse	Facility Modification	The court is reorganizing the Victorville district in an effort to address the increasingly complex Family Law and Criminal caseloads. During communications with other County Justice Partners regarding the reorganization, it was decided that Family Law would be relocated to the Barstow District. To accommodate this, the court and the County have agreed upon a no cost lease arrangement for County exclusive space within the building. The court has agreed to pay the County operation and maintenance portion for use of the space as defined by the amended JOA. This Court Funding Request for \$398,282.00 will cover the operation and maintenance of the leased space from the County in the Barstow District for the five (5) year term.	5-Year	TCTF	\$ 398,282
15	36-CFR068	San Bernardino	36-A1	Central Courthouse	Facility Modification	The court is looking to remodel three of the buildings main public restrooms. This CFR for \$250,000.00 will cover the cost associated with the remodeling of restrooms. The scope of work will include: design, testing, floor/wall tile, fixtures, partitions, electrical, paint, and doors.	One- Time	Non- TCTF	\$250,000
16	37-CFR035	San Diego	37-C1	Kearny Mesa Court	Facility Modification	San Diego Superior Court is requesting the Judicial Council to approve a CFR funded project for the structural investigation, design and installation of a 12" high raised floor. The raised floor system would be "Tate" Access Flooring or similar and will accommodate 6 public counter stations at the south side and 8 public counter stations at the west side of the business office. The raised flooring system should include ADA ramps, handrails, etc.	One- Time	TCTF	\$50,000
17	41-CFR004	San Mateo	41-F1	Juvenile Branch, Paul Scannell Drive	Facility Modification	Re keying of all court areas to the court Primus system. Estimated cost is \$26,000.	One- Time	Operating Budget	\$26,000
18	41-CFR005	San Mateo	41-C1	Northern Branch Courthouse	Facility Modification	Re keying of all court areas to the court Primus system. Estimated cost is \$80,000.	One- Time	Operating Budget	\$80,000
19	41-CFR006	San Mateo	41-F1	Juvenile Branch, Paul Scannell Drive	Facility Modification	CFR for Installation of a floor sink. Estimated cost is \$25,000.	One- Time	Operating Budget	\$25,000
20	52-CFR006	Tehama	52-E1	Tehama County Courthouse	Facility Modification	Minor renovation of workspace within Family Court Services and security enhancement.	One- Time	TCTF	\$160,000
21	58-CFR005	Yuba	58-A1	Yuba County Courthouse	Facility Modification	The Court seeks to complete certain remodeling and maintenance work on the 3rd Floor in order to improve the usability of the space. The Court would relocate the back hallway door in the family services clerk's office area to accommodate two new clerk workstations. Work would include wall repair, install trim, finishes and installing lock hardware. We would also install electrical outlets in the self-help workshop, to enable computer installation/usage. The second proposed project on the 3rd Floor would be to level the (currently sloped) floor in the Dept 6 courtroom and install removable audience seating. The current slope is not ADA compliant, restricting its use by the court. These changes would create a space for a jury assembly room, meeting area, and self-help workshop area, as well as a working courtroom. Due to the unknown total budget costs for this project, this CFR includes only the cost for an engineer to determine the project scope details, as well as an informed project cost estimate. All work would be completed by the County of Yuba.	One- Time	TCTF	\$125,200
22	36-CFR069	San Bernardino	36-J1	Barstow Courthouse	Lease	The court is reorganizing the Victorville district in an effort to address the increasingly complex Family Law and Criminal caseloads. During communications with other County Justice Partners regarding the reorganization, it was decided that Family Law would be relocated to the Barstow District. To accommodate this, the court and the County have agreed upon a no cost JOA Amendment arrangement for County exclusive space within the building. The court has agreed to pay the County operation and maintenance portion for use of the space as defined by the amended JOA. # Annual Summary of Facility Modifications for Fiscal Year 2019-20

---

SEPTEMBER 25, 2020

JUDICIAL COUNCIL  
OF CALIFORNIA

---

TRIAL COURT FACILITY MODIFICATION  
ADVISORY COMMITTEE

## Executive Summary

The Trial Court Facility Modification Advisory Committee (TCFMAC) reviews and approves facility modification (FM) requests from across the state in accordance with the Judicial Council's *Trial Court Facility Modifications Policy* (see Link A). As required annually by the policy, the final quarter report for each fiscal year also includes the annual summary of facility modifications. In fiscal year (FY) 2019–20, the Facility Modification Program budget was authorized for \$65 million, and examples of significant completed facility modifications are presented in Attachment D-I. TCFMAC priorities included the following:

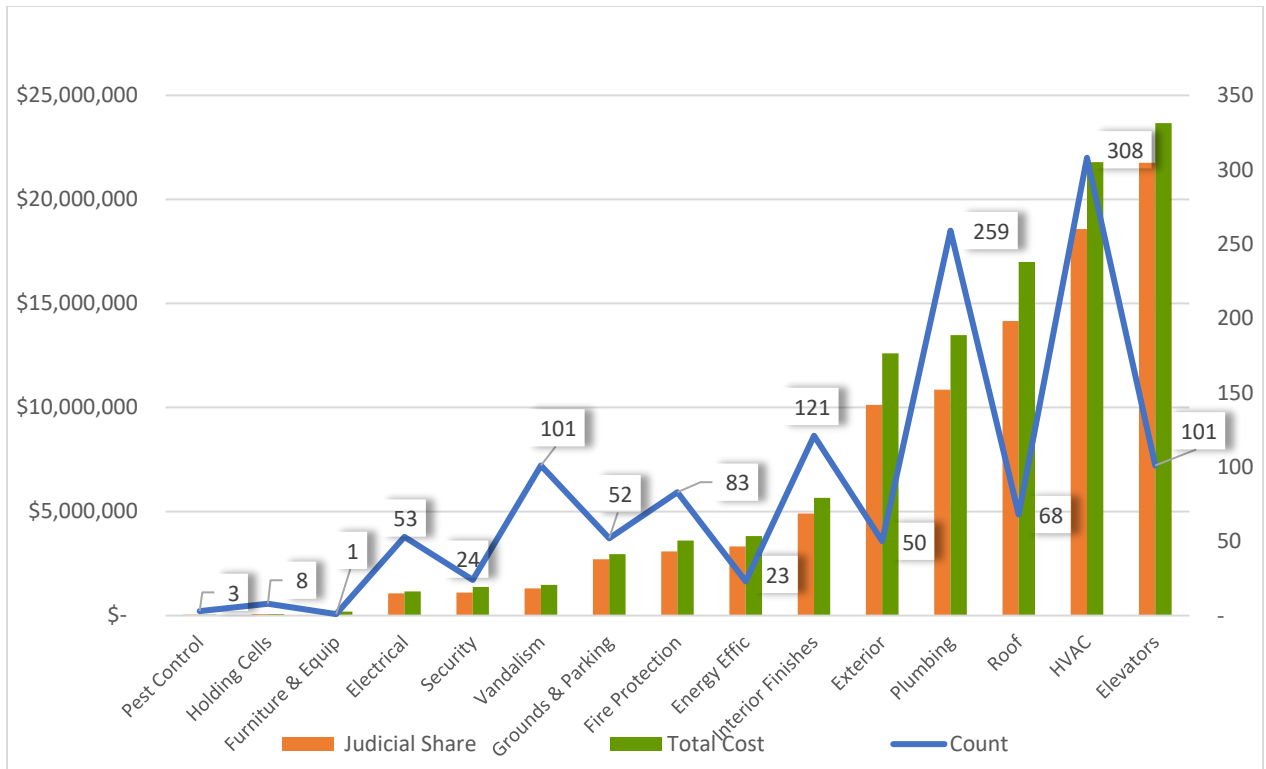

- \$37.4 million was the Judicial Council's share for 1,243 Priority 1, 2, and 3 FM projects (see Attachment D-II). These projects were funded as follows:
  - \$17.3 million was spent on 592 Priority 1 projects,
  - \$19.5 million was spent on 650 planned and unplanned Priority 2 projects, and
  - \$594,728 was spent on 1 Priority 3 energy-efficiency project;
- \$10.7 million was for secondary project phases and cost increases;
- \$2.4 million was to support statewide FM planning (i.e., project management functions and preliminary project planning and estimating); and
- Approximately \$1.6 million was to cover the judicial branch's share of costs for county-managed emergency projects.

In FY 2019–20, a total of 1,255 Priority 1, 2, and 3 facility modifications were completed (see figure 1 and Attachment D-III), and 215 were canceled (see figure 2 and Attachment D-IV).

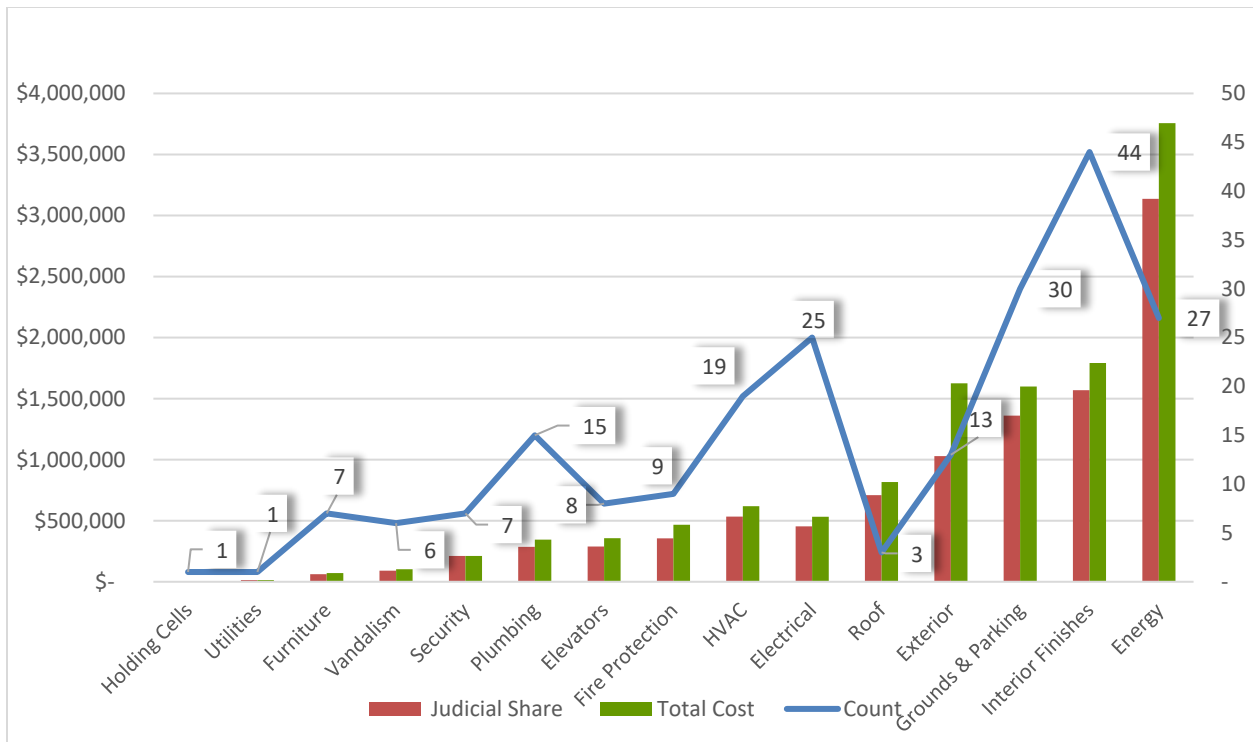

Figure 1 presents the distribution by project type of all 1,255 facility modifications completed in FY 2019–20. Also shown is the total cost and Judicial Council Share of each project type. Attachment D-III presents the details of each completed facility modification.

Figure 2 presents the distribution by project type of all 215 facility modifications canceled in FY 2019–20. Also shown is the total cost and Judicial Council Share of each project type. Attachment D-IV presents the details of each cancelled facility modification.

**Figure 1: All Facility Modifications Completed in FY 2019–20**

**Figure 2: All Facility Modifications Canceled in FY 2019–20**

Trial courts can self-fund projects through the Court-Funded Facilities Request Program administered by Judicial Council staff. Funded by the trial courts in FY 2019–20 were 63 FM-related projects with a total estimated cost of \$20.1 million and 12 lease-related requests with a total estimated cost of \$4.6 million.

In FY 2018–19, the FM Program received one-time additional funding for deferred maintenance from the state General Fund in the amount of \$50 million for encumbrances over three fiscal years. The previous funding of \$45 million for deferred roof, elevator, and escalator projects is currently in progress. This funding was applied to approximately 32 completed projects (24 roof replacement projects, 7 elevator/escalator projects, and 1 gutter/downspout project) and 16 projects that are currently in construction (12 elevator/escalator projects, 2 wheelchair lift replacement projects and 2 roof replacement projects) (see Attachment D-V).

The current level of funding for facility modifications is insufficient to address needs statewide. The TCFMAC could not fund all needed facility modifications in FY 2019–20, as reflected in the *Five-Year Master Plan—Deferred Maintenance Report, FY 2020–21* (see Link B) submitted to the California Department of Finance. The current level of funding allows the TCFMAC to address only the most critically needed Priority 1–2 (and some Priority 3) facility modifications statewide. These facility modifications have all reached a level of critical need requiring immediate attention, such as roof replacements, elevator renovations, and the replacement of cooling towers and chillers to restore basic building functions. Lower-priority (Priority 4–6) projects—such as facility modifications for replacement of interior finishes, security enhancements, and painting of building interiors and exteriors—will continue to be deferred until they reach a level of critical need.

## **Funding Sources and Restrictions**

The Facility Modification Program is funded from four sources:

- State Court Facilities Construction Fund;
- Immediate and Critical Needs Account, Senate Bill 1407 (Perata; Stats. 2008, ch. 311) funding;
- Court Facilities Architecture Revolving Fund, established as a depository for the transfer of money for construction, repair, alteration, and improvement of both trial and appellate court buildings; and
- Reimbursable funds, to cover a county’s share of FM costs in shared-use facilities.

## **Significant Expenditures in FY 2019–20**

Contractors for both the Judicial Council and the counties performed 1,243 facility modifications in FY 2019–20 (see Attachment D-II), for a total combined cost of \$37.4 million. Most of these facility modifications had a total cost of less than \$50,000. Of the 1,243 FM projects, 11 had

costs over \$300,000, for a total combined cost of approximately \$13.9 million (see Attachment D-VI).

### Advisory Committee Activities

At its meeting on December 3, 2018, the TCFMAC recommended approval of the *Judicial Council Policy on Asbestos Management for Court Facilities* (see Attachment D-VII). Subsequently, and at its meeting on December 13, 2018, the Judicial Council’s Executive and Planning Committee adopted this policy on behalf of the Judicial Council.

Using the facility modification ranking methodology provided in the FM policy, Judicial Council staff prepare a preliminary ranking list of all submitted facility modifications for the TCFMAC to review. The TCFMAC reviews, revises, and finalizes this list for use when considering which facility modifications to fund. Table 1, outlines the activities of the TCFMAC in FY 2019–20, indicating the number of facility modifications reviewed and approved, funded and open, completed, and cancelled (also see Attachments D-II, D-III and D-IV).

**Table 1: Facility Modification Activity in FY 2019–20**

	Number of Facilities Modifications	Estimated Total Cost (in millions)	Judicial Council Share (in millions)
Reviewed and Approved	1,243	\$45.3	\$37.4
Funded and Open*	620	\$113.7	\$98.1
Completed†	1255	\$99.5	\$85.2
Canceled‡	215	\$12.3	\$10.1

\* Includes all funded facility modifications that were open as of June 30, 2020, regardless of the year of funding.

† Includes all facility modifications completed during FY 2019–20, regardless of the year of funding.

‡ Includes unfunded facility modifications.

A summary of FM funding in FY 2019–20 by priority and by court approval is provided in Attachment D-II. Most of the funding was dedicated to Priority 2 facility modifications.

Figure 3, shows how funding of the priority categories has changed over time. From FY 2006–07 through FY 2008–09, funding was available for projects in all priority categories. Beginning in FY 2009–10, need outweighed funding, and funded projects were limited to those in priority categories 1 and 2 and some in category 3 and 4. Figure 3 also represents the breakdown of dollars spent by priority category, expressed as a percentage of the facility modifications funded during each fiscal year. The line represents the growth over time in square footage for which the Judicial Council has responsibility. Funding has not kept pace with square footage responsibility.

## Operations and Maintenance

The TCFMAC oversees court facility maintenance and repairs that must be performed periodically throughout the life of a facility to keep the building, equipment, and utilities infrastructure in a condition adequate to support its designed level of service. Broad oversight of the entire existing facility management program under one advisory committee helps ensure that the various aspects of the program are coordinated and are as cost-effective as possible.

***Court Facilities Trust Fund (CFTF).*** In 2002, the CFTF was established by the Trial Court Facilities Act (Sen. Bill 1732; Stats. 2002, ch. 1082, and subsequent modifying language) to fund the ongoing operations, repair, and maintenance of trial court facilities transferred from the counties to the state. Through December 2009, more than 500 trial court facilities transferred to the Judicial Council, along with the responsibility to fund ongoing operations, repair, and maintenance costs. The Act requires each county that transferred trial court facilities to pay a county facility payment (CFP) to the state. The CFP was determined by the amount the county had expended historically on court facilities operations and maintenance (O&M), with the intent that needed funding exceeding the CFP be provided by the state through future state General Fund augmentations. Supplemental funding was last provided from the state

General Fund in FY 2010–11. Over time, and to address the revenue shortfall, O&M has been cut to extremely low levels, while utility costs have increased statewide at a pace faster than inflation.

The CFTF is the only fund available to pay the costs of ongoing O&M of trial court facilities. Its primary revenue source is CFPs. CFPs constitute approximately 80 percent of the fund’s revenue, with the balance coming from other sources, such as rental of court facilities and parking. Almost 90 percent of the CFTF expenditures fund utilities (e.g., electricity, gas, water, and sewer) and ongoing maintenance, with the balance used to pay for leases and insurance.

***Projected funding shortfall in outlying fiscal years, and action plan.*** In future fiscal years, the CFTF is expected to have a deficit of funds. On May 18, 2017, the Judicial Council directed the TCFMAC to address the CFTF’s expected funding shortfall by reducing O&M costs in trial court facilities statewide. Operations and maintenance costs were negotiated with onsite service providers, delegated trial courts, and counties, with the goal of a 10 percent reduction in costs.

Judicial Council staff collaboratively worked with the trial courts to implement a series of conservation and energy-efficiency strategies, including:

- Implementing energy-efficiency lighting and HVAC projects;
- Controlling plug load;
- Tracking and reporting utility cost and usage; and
- Assisting the trial courts with the implementation of updated energy conservation guidelines adopted by the Judicial Council in September 2017.

## **Sustainability Plan**

In January 2020, Judicial Council Facilities Services presented a sustainability plan to the TCFMAC that focuses primarily on ensuring that new construction practices comply with state sustainability initiatives and help reduce the judicial branch’s impact on climate change. Additional goals include reducing energy usage, carbon footprint, and utility costs.

The Judicial Council plans to achieve these goals by pursuing energy efficiency measures; educating staff, key stakeholders, and service providers on specific energy-saving practices and broader sustainability issues; conserving other natural resources; and improving the power resiliency of the judicial branch’s portfolio through onsite renewable energy systems and storage.

## **Funding Concerns and Outlook**

Because need exceeds operations and maintenance (O&M) funding, Judicial Council staff maintain facilities in a run-to-failure environment that focuses exclusively on projects that respond to failed building systems. This run-to-failure environment results in otherwise avoidable disruptions to court operations because needed renewals of building systems are not timely performed. Court operations are affected by issues such as HVAC (heating, ventilation,

and air conditioning) system failures, electrical service outages, and facility closures resulting from water leaks. Without an adequate O&M budget to perform preventative maintenance, these critical systems will continue to fail, interrupt court operations, and limit the public’s access to justice.

These projects are a priority to maintain continuity of court operations in facilities throughout the state. Examples of these critical system replacements that place the public’s safety at risk in court facilities include but are not limited to the following:

- Failed roofing systems causing interior structural damage;
- Failed fire protection monitoring systems causing safety issues;
- Failed elevator systems causing entrapments;
- Failed HVAC equipment causing uncomfortable or unsafe respiratory conditions; and
- Failed plumbing systems causing flooding.

Figure 4, presents the needed costs of unfunded projects by building system.

**Figure 4: Identified Requests by Building System<sup>1</sup>**

\* Costs as of June 30, 2020. Building system coding aligns with UNIFORMAT II principles as set by the National Institute of Standards and Technology—NISTIR 6389.

Obtaining adequate funding continues to challenge the Judicial Council and its TCFMAC as it implements the council's Facility Modification Program and funds facilities O&M. However, the council and its TCFMAC continue to complete as much work as possible on existing facilities with available funding.

# Judicial Council Policy on Asbestos Management for Court Facilities

---

DECEMBER 13, 2018

**1. Purpose and Scope of the Policy**

This policy informs Judicial Council staff of the requirements to manage asbestos hazards on behalf of the Judicial Council for renovation and/or demolition activities performed in court facilities.

**2. Goals and Principles Guiding Asbestos Management**

The Judicial Council must take appropriate measures to protect all users of court facilities from harmful exposure to asbestos. Any person or entity performing renovation and/or demolition activities in court facilities, regardless of the age of the court facility, must comply with applicable federal and state statutes and regulations relating to the proper handling, removal, and management of asbestos-containing materials.

**3. Definitions**

3.1. **Asbestos:** As used herein, shall have the same definition as stated in California Code of Regulations, title 8, section 1529 and including, but not limited to, any of the following silicate minerals: chrysotile, crocidolite, amosite, fibrous tremolite, fibrous actinolite, fibrous anthophyllite, and any of these minerals that have been chemically treated and/or altered.

3.2. **Asbestos-Containing Materials:** Both friable and nonfriable asbestos-containing materials.

3.3. **Asbestos-Containing Construction Material:** Any manufactured construction material that contains more than 1 percent asbestos by weight.

3.4. **Court Facilities:** Court buildings or facilities that are owned by the State of California or managed by the Judicial Council, including those titled to and located in the County but managed by the Judicial Council under an agreement between the County and the Judicial Council.

3.5. **Renovation Activity:** The modification or alteration of an existing court facility or portion of the court facility.

3.6. **Demolition Activity:** The wrecking or taking out of any load-supporting structural member of a court facility.

**4. Requirements for Asbestos Management of Renovation and/or Demolition Activities**

4.1. All entities performing renovation and/or demolition activities at court facilities must be aware of the potential hazards and adverse health effects of asbestos and must have a written program that establishes the safety and work procedures to be followed by the entity when the activities involve asbestos-containing materials or asbestos-containing construction materials.

4.2. The written program must comply with applicable federal, state, and local laws and regulations, as well as asbestos-related labor and business laws, and regulations regarding asbestos management, storage, and disposal.

4.3. Work conducted or managed by Judicial Council staff in court facilities must follow the program established by the Facilities Services office.

4.4. All entities performing renovation and/or demolition activities at court facilities must follow the Asbestos Notification Requirements established in this policy.

## **5. Asbestos Notification Requirements**

- 5.1 Entities planning to perform demolition activities, or renovation activities that have the potential to disturb asbestos-containing materials, in a court facility must notify the Facilities Services office 10 workdays before any such activities. Notice required by this section must be provided to the following address by mail or email:

Judicial Council of California  
Attention: Risk Manager, Environmental Health and Safety Unit  
2860 Gateway Oaks, Suite 400  
Sacramento, California 95833  
EHS@jud.ca.gov

- 5.2 On completion of the demolition or renovation activities, all entities managing work in a court facility must provide the Facilities Services office with all supporting documentation for the management and disposal of asbestos-containing materials.
- 5.3 The Judicial Council must notify all employees working within the court facility concerning the following:
- 5.3.1 The existence of conclusions from and a description or list of the contents of any survey known to the Judicial Council to have been conducted to determine the existence and/or location of asbestos-containing construction materials within the building, and information describing when the results of the survey will be or became available and where.
- 5.3.2 Specific locations within the court facility known to the Judicial Council (or identified in a survey known to the owner) where asbestos-containing construction materials are present in any quantity.
- 5.3.3 General procedures and handling restrictions necessary to prevent, and if appropriate, minimize disturbance of, release of, and exposure to asbestos. If detailed handling instructions are necessary to ensure employee safety, the notice must indicate where those instructions can be found.
- 5.3.4 A summary of the results of any bulk sample analysis, air monitoring, or monitoring conducted for or by the Judicial Council under section 5208 of title 8 of the California Code of Regulations, including reference to sampling and laboratory procedures used and information describing when the specific monitoring data and sampling procedures will be or became available and where.
- 5.3.5 Potential health risks or impacts that may result from exposure to asbestos in the court facility, as identified in surveys or tests referred to in this section or otherwise known to the Judicial Council.

## **6. Questions Regarding Asbestos Management**

Judicial Council Facilities Services staff are available to assist with questions regarding asbestos management and the written program controlling asbestos management.

**Summary and Recommended Action**

Facilities Services staff is submitting a draft of the *Five-year Master Plan – Deferred Maintenance Report for Fiscal Year 2020–21* for action to submit to the state Department of Finance (DOF). This draft report presents a total of 23,597 deferred maintenance projects at an estimated, rough order of magnitude cost of \$5.2 billion, with the Judicial Council share being \$4.1 billion.

As you are aware, in 2019 staff completed Facilities Conditions Assessments (FCAs) for the majority of occupied court facilities. The FCAs were funded from the one-time, General Fund of \$5 million available that year for statewide deferred maintenance funding in (Control Section 6.10 of) the 2018 Budget Act.

The newly completed FCAs generated more accurate deferred maintenance data for each courthouse assessed. The increase in the deferred maintenance costs from \$2.3 billion to \$5.2 billion is primarily attributed to the more current data. Other factors such as cost escalation and the continued aging of our facilities also factor into the cost increase. The attached exhibits provide the estimated project cost totals and Judicial Council's total as a result of county equity/ownership.
