Attachment 9
Features List: Configuration

Priority	Requirement Name	Requirement Text	Response	Comment		
High	*Configuration*	The system must be configured during initial deployment to meet Court specific business requirements. Describe Vendor's strategy and processes to gather, load and validate localized configuration. Explain the roles and responsibilities for those involved in the process.				
High	*Configuration*	Describe the process and tools used for initial loads and maintaining configurable items (ex. Filings, Bail schedules, users, workflow) within the system.				
Medium	*Configuration*	Specify whether all application configuration is done through screens intended to be used by local courts for ongoing maintenance.				
High	*Configuration*	Describe the roles and responsibilities involved in configuration maintenance. If configuration maintenance is a vendor responsibility, describe the SLAs in this task.				
High	*Configuration*	The system should support the entry of legacy cases and, thus, application configuration for multiple timeframes (for example, bail schedules with various fines based on dates). Describe how Vendor's system supports this requirement.
