

ADDENDUM NO. 1

Summary of this Addendum:

- The Proposal Deadline of October 8, 2004, 1 p.m., is hereby changed to October 15, 2004, 1 p.m.
- Questions and Answers received are as noted:

Q-1. There are several disciplines required for this RFQ. Are you looking for 1 company to fill them all, or may companies submit for select disciplines in their field?

A-1. Our RFQ is looking for variety of discipline work, I know some companies may qualify to do all, using their own staff. Where as some may sub out some work and do some in-house, or some may select to provide services in partnership with others. The bottom line is the AOC is looking for an ability to provide a full range of services in all regions of California. Companies may and should only submit for those services for which they are qualified to provide or perform and/or qualified to provide via a subcontract with a qualified provider

Q-2. I understand that this contract is an "as needed basis" so there is no budget. However, can you give me a rough idea of what may be spent (perhaps the budget that was spent on environmental projects last year).

A-2. Last year's budget was in excess of \$500,000.00, this years budget will exceed that amount, and will increase to match the work load demand.

Q-3. Does one of the disciplines dominate as far as the work that is typically needed or do you see it all?

A-3. Typically, last years work load was for the Environmental Due Diligence Phase I investigations, and follow up Phase II work. With some air quality and lot survey related work for property line delineation. We anticipate 80% of the similar activities with CEQA and remediation oversight work added to this years work load.
